Fairfield City

Local Flood Plan
April 2016

To be reviewed no later than April 2021

FAIRFIELD CITY FLOOD EMERGENCY SUB PLAN

A Sub-Plan of the Fairfield Local Emergency Management Plan (EMPLAN)

Volume 1 of the Fairfield City Local Flood Plan
AUTHORISATION

The Fairfield City Flood Emergency Sub Plan is a sub plan of the Fairfield Local Emergency Management Plan (EMPLAN). It has been prepared in accordance with the provisions of the State Emergency Service Act 1989 (NSW) and is authorised by the Local Emergency Management Committee in accordance with the provisions of the State Emergency and Rescue Management Act 1989 (NSW).

Recommended

NSW SES Fairfield City Local Controller

Date: 17/3/16

Approved

Chair, Local Emergency Management Committee

Date: 11/4/16

GLOSSARY

Annual Exceedance Probability (AEP). The chance of a flood of a given or larger size occurring in any one year, usually expressed as a percentage. For example, if a peak flood level (height) has an AEP of 5%, there is a 5% chance (that is, a one-in-20 chance) of such a level or higher occurring in any one year (see also Average Recurrence Interval).

Assistance Animal. A guide dog, a hearing assistance dog or any other animal trained to assist a person to alleviate the effect of a disability (Refer to Section 9 of the Disability Discrimination Act 1992).

Assembly Area. An assembly area is a designated location used for the assembly of emergency-affected persons before they move to temporary accommodation or a nominated evacuation centre. As such these areas do not provide welfare assistance nor are they used for long term sheltering or provision of meals. An assembly area may also be a prearranged, strategically placed area, where support response personnel, vehicles and other equipment can be held in readiness for use during an emergency.

Australian Height Datum (AHD). A common national surface level datum approximately corresponding to mean sea level.

Average Recurrence Interval (ARI). The long-term average number of years between the occurrence of a flood as big as, or larger than, the selected event. For example, floods reaching a height as great as, or greater than, the 20 year ARI flood event will occur on average once every 20 years.

Catchment (River Basin). The land area draining through the main stream, as well as tributary streams, to a particular site. It always relates to an area above a specific location.

Coastal Erosion. The loss of land along the shoreline predominantly by the offshore movement of sand during storms.

Coastal Flooding. Flooding due to tidal or storm-driven coastal events, including storm surges in lower coastal waterways. This can be exacerbated by wind-wave generation from storm events (1).

Dambreak Study. A Dambreak Study is undertaken to determine the likely downstream inundation areas in case of a dam failure. Modelling is undertaken for a range of dam breach possibilities and design floods. The dambreak study includes information such as the extent of flooding, flood travel times and flood water velocities. The study can assist dam owners, regulators, and emergency agencies in
the preparations of evacuation plans, dam break and other flood warning systems, and hazard classification of affected areas.

**Dam Failure.** The uncontrolled release of a water storage. The failure may consist of the collapse of the dam or some part of it, or excessive seepage or discharges. The most likely causes of dam failure are:

- **Flood Induced Dam Failure:** Dam failure caused by flood, either due to overtopping erosion or by subsequent structural failure.
- **Sunny Day Dam Failure:** Dam Failure as a result of factors other than flood i.e. other than flood flow into the reservoir. Causes of "Sunny Day" dam failure can include internal erosion, landslide, piping, earthquake or sabotage.

**Dam Safety Emergency Plan (DSEP).** A DSEP outlines the required actions of owners and their personnel at dams in response to a range of possible emergency situations. The NSW Dam Safety Committee requires a quality controlled DSEP, with associated dambreak warning procedures to be prepared for prescribed dams where persons may be at risk downstream, if the dam failed.

**Design Flood (or Flood Standard).** A flood of specified magnitude that is adopted for planning purposes. Selections should be based on an understanding of flood behaviour and the associated flood risk, and take account of social, economic and environmental considerations. There may be several design floods for an individual area.

**Emergency Alert.** The national telephone warning system used by emergency services to send voice messages to landlines and text messages to mobile phones within a defined area, about likely or actual emergencies.

**EMPLAN (Emergency Management Plan).** The Plan established in accordance with the Provisions in the *State Emergency Rescue Management Act 1989*. The object of an EMPLAN is to ensure the coordinated response by all agencies having responsibilities and functions in emergencies.

**Essential Services.** Those services, often provided by local government authorities, that are considered essential to the life of organised communities. Such services include power, lighting, water, gas, sewerage and sanitation clearance.

**Evacuation.** The temporary movement of people from a dangerous or potentially dangerous place to a safe location, and their eventual return. It is a safety strategy which uses distance to separate people from the danger created by the hazard.

**Evacuation Order.** Notification to the community, authorised by the NSW SES, when the intent of an Incident Controller is to instruct a community to immediately evacuate in response to an imminent threat.
Evacuation Warning. Notification to the community, authorised by the NSW SES, when the intent of an Incident Controller is to warn a community of the need to prepare for a possible evacuation.

Flash Flooding. Flooding which is sudden and often unexpected because it is caused by sudden local or nearby heavy rainfall. It is sometimes defined as flooding which occurs within six hours of the rain that causes it.

Flood. Relatively high water level which overtops the natural or artificial banks in any part of a stream, river, estuary, lake or dam, and/or local overland flooding associated with drainage before entering a watercourse, and/or coastal inundation resulting from super-elevated sea levels and/or waves overtopping coastline defences, including Tsunami.

Flood Classifications. Locally defined flood levels used in flood warnings to give an indication of the severity of flooding (minor, moderate or major) expected. These levels are used by the State Emergency Service and the Australian Government Bureau of Meteorology in flood bulletins and flood warnings.

Flood Intelligence. The product of collecting, collating, analysing and interpreting flood-related data to produce meaningful information (intelligence) to allow for the timely preparation, planning and warning for and response to a flood.

Flood Fringe. The remaining area of flood prone land after floodway and flood storage have been defined.

Flood Liable Land (also referred to as Flood Prone Land). Land susceptible to flooding by the Probable Maximum Flood (PMF) event. This term also describes the maximum extent of a floodplain which is an area of a river valley, adjacent to the river channel, which is subject to inundation in floods up to this event.

Flood of Record. Maximum observed historical flood.

Floodplain. Area of land which is subject to inundation by floods up to and including the probable maximum flood event, that is, flood prone land (2).

Floodplain Management Plan. A plan developed in accordance with the principles and guidelines in the New South Wales Floodplain Development Manual. Such a plan usually includes both written and diagrammatic information describing how particular areas of flood prone land can be used and managed to achieve defined objectives.

Flood Plan. A response strategy plan that deals specifically with flooding and is a sub-plan of an Emergency Management Plan. Flood plans describe agreed roles, responsibilities, functions, strategies and management arrangements for the
conduct of flood operations and for preparing for them. A flood plan contains information and arrangements for all floods whereas an IAP is for a specific flood/event.

**Flood Rescue.** The rescue or retrieval of persons trapped by floodwaters.

**Flood Storage Areas.** Those parts of the floodplain that are important for the temporary storage of floodwaters during the passage of a flood. The extent and behaviour of flood storage areas may change with flood severity, and loss of flood storage can increase the severity of flood impacts by reducing natural flood attenuation.

**Floodway.** An area where a significant volume of water flows during floods. Such areas are often aligned with obvious naturally-defined channels and are areas that, if partially blocked, would cause a significant redistribution of flood flow which may in turn adversely affect other areas. They are often, but not necessarily, the areas of deeper flow or the areas where higher velocities occur.

**Flood Watch.** A Flood Watch is a notification of the potential for a flood to occur as a result of a developing weather situation and consists of short generalised statements about the developing weather including forecast rainfall totals, description of catchment conditions and indicates streams at risk. The Bureau will also attempt to estimate the magnitude of likely flooding in terms of the adopted flood classifications. Flood Watches are normally issued 24 to 36 hours in advance of likely flooding. Flood watches are issued on a catchment wide basis.

**Flood Warning.** A Flood Warning is a gauge specific forecast of actual or imminent flooding. Flood Warnings specify the river valley, the locations expected to be flooded, the likely severity of flooding and when it will occur.

**Functional Area.** A category of services involved in the preparations for an emergency, including the following:

- Agriculture and Animal Services;
- Energy and Utility Services;
- Engineering Services;
- Environmental Services;
- Health Services;
- Public Information Services;
- Telecommunication Services;
- Transport Services; and
- Welfare Services.
**Geographic Information System (GIS).** A geographic information system (GIS) integrates hardware, software, and data for capturing, managing, analysing, and displaying all forms of geographically referenced information.

**Incident Controller.** The individual responsible for the management of all incident control activities across a whole incident (3).

**Incident Action Plan (IAP).** An action plan for managing a specific event. Information from the Local Flood Plan is used to develop the flood IAP.

**Indirect Effect.** Indirect effects are generally a consequence of infrastructure damage or interruption of services and can affect communities distant from the actual flood footprint i.e. floodplain. Indirect effects can also refer to indirect losses due to disruption of economic activity, both in areas which are inundated or isolated. Indirect effects are one of the three primary sources of risk in the context of flooding (the other two are inundation and isolation).

**Inundation.** See definition for Flood.

**Isolation.** Properties and/or communities where flooding cuts access to essential services or means of supply. Isolation is one of the three primary sources of risk in the context of flooding (the other two are inundation and indirect effects).

**Liaison Officer (LO).** A person, nominated or appointed by an organisation or functional area, to represent that organisation or functional area at a control centre, emergency operations centre, or coordination centre. A liaison officer maintains communications with and conveys directions/requests to their organisation or functional area, and provides advice on the status, capabilities, actions and requirements of their organisation or functional area (3).

**Local Emergency Management Committee (LEMC).** The LEMC is responsible for the preparation of plans in relation to the prevention of, preparation for, response to and recovery from emergencies in the local government area for which it is constituted. In the exercise of its functions, the Committee is responsible to the Region Emergency Management Committee (REMC) and may communicate with the REMC for matters associated with Functional Areas that are not represented at the local Level.

**Local Overland Flooding.** Inundation by local runoff rather than overbank discharge from a stream, river, estuary, lake or dam.

**Major Flooding.** Flooding which causes inundation of extensive rural areas, with properties, villages and towns isolated and/or appreciable urban areas flooded.
Minor Flooding. Flooding which causes inconvenience such as closing of minor roads and the submergence of low-level bridges. The lower limit of this class of flooding, on the reference gauge, is the initial flood level at which landholders and/or townspeople begin to be affected in a significant manner that necessitates the issuing of a public flood warning by the Australian Government Bureau of Meteorology.

Moderate Flooding. Flooding which inundates low-lying areas, requiring removal of stock and/or evacuation of some houses. Main traffic routes may be covered.

Moveable Dwellings. Any tent, or any caravan or other van or other portable device (whether on wheels or not), used for human habitation; or a manufactured home; or any conveyance, structure or thing of a class or description prescribed by the (Local Government) regulations (4).

Operational Area Commander. The individual commanding an operational area. An Operational Area Command may be established for an area with multiple incident management teams functioning, and can cross local government and NSW SES Region boundaries (5).

Peak Height. The highest level reached, at a nominated gauging station, during a particular flood event.

Prescribed Dam. "Prescribed" dams are those listed in Schedule 1 of the Dams Safety Act 1978. The NSW Dam Safety Committee will prescribe those dams with the potential for a failure which could have a significant adverse effect on community interests.

Probable Maximum Flood (PMF). The largest flood that could conceivably be expected to occur at a particular location, usually estimated from probable maximum precipitation. The PMF defines the maximum extent of flood prone land, that is, the floodplain. It is difficult to define a meaningful Annual Exceedance Probability for the PMF, but it is commonly assumed to be of the order of $10^4$ to $10^7$ (once in 10,000 to 10,000,000 years).

Riverine Flooding. Inundation of normally dry land occurring when water overflows the natural or artificial banks of a stream, river, estuary, lake or dam. Riverine flooding generally excludes watercourses constructed with pipes or artificial channels considered as stormwater channels (1).

Runoff. The amount of rainfall which ends up as stream flow, also known as ‘rainfall excess’ since it is the amount remaining after accounting for other processes such as evaporation and infiltration.

Stage Height. A level reached, at a nominated gauging station, during the development of a particular flood event.
Stream Gauging Station. A place on a river or stream at which the stage height is routinely measured, either daily or continuously, and where the discharge is measured from time to time so as to develop a relationship between stage and discharge or rating curve.

Total Flood Warning System. A flood warning system is made up of components which must be integrated if the system is to operate effectively. Components of the total flood warning system include monitoring rainfall and river flows, prediction, interpretation of the likely impacts, construction and dissemination of warning messages, response by agencies and community members, and review of the warning system after flood events (1).
PART 1 - INTRODUCTION

1.1 PURPOSE

1.1.1 This plan covers preparedness measures, the conduct of response operations and the coordination of immediate recovery measures from flooding within the Fairfield LGA. It covers operations for all levels of flooding within the council area.

1.2 AUTHORITY

1.2.1 This plan is issued under the authority of the State Emergency and Rescue Management Act 1989 (NSW) and the State Emergency Service Act 1989 (NSW). It has been approved by the NSW SES Fairfield City Local Controller and the NSW SES Sydney Southern Region Controller as a NSW SES plan and endorsed by the Fairfield Local Emergency Management Committee as a sub plan of the Local EMPLAN.

1.3 AREA COVERED BY THE PLAN

1.3.1 The area covered by the plan is the Fairfield LGA.

1.3.2 The council area and its principal river and creeks are shown in Attachment 3.

1.3.3 The council area is in the NSW SES Sydney Southern Region and for emergency management purposes is part of the South West Metropolitan Emergency Management Region.

1.4 DESCRIPTION OF FLOODING AND ITS EFFECTS

1.4.1 The Council area faces a number of flood threats including those from:

   a. The Georges River and its tributaries

   b. A number of creeks and their respective tributaries including Prospect Creek, Cabramatta Creek, Burns Creek, Ropes Creek, Reedy Creek, Eastern Creek, Orphan School Creek, Clear Paddock Creek and Green Valley Creek

   c. Overland flooding impacts significantly on parts of the Fairfield LGA.

1.4.2 The NSW SES maintains information on the nature of flooding and effects of flooding on the community in the Fairfield LGA.
1.5 RESPONSIBILITIES

1.5.1 The general responsibilities of emergency service organisations and supporting services (functional areas) are listed in the Local and State Emergency Management Plans (EMPLAN). Some specific responsibilities are expanded upon in the following paragraphs. The extent of their implementation will depend on the severity of the flooding.

1.5.2 **NSW SES Fairfield City Local Controller.** The NSW SES Fairfield City Local Controller is responsible for dealing with floods as detailed in the State Flood Plan, and will;

**Preparedness**

b. Ensure that NSW SES members are trained to undertake operations in accordance with current policy as laid down in the NSW SES Controllers’ Guide and the NSW SES Operations Manual.

c. Coordinate the development and operation of a flood warning service for the community.

d. Participate in floodplain risk management initiatives organised by the Fairfield City Council.

e. Coordinate a community engagement and capacity building program regarding local flood issues and associated risks to assist communities in building resilience to floods.

f. Identify and monitor people and/or communities at risk of flooding.

g. Ensure that the currency of this plan is maintained.

**Response**

h. Appoint an appropriate Incident Controller to undertake response roles. The Incident Controller will;

- Control flood and storm response operations. This includes;
  - Directing the activities of the NSW SES units operating within the council area.
  - Coordinating the activities of supporting agencies and organisations and ensuring that liaison is established with them.
  - Contribute to the preparation of the Region IAP.

- Coordinate the provision of information services in relation to;
  - Flood heights and flood behaviour.
  - Road conditions and closures.
• Advice on methods of limiting property damage.
• Confirmation of evacuation warnings and evacuation orders.

• Direct the conduct of flood rescue operations.

• Coordinate the provision of the evacuation of people and/or communities.

• Provide immediate welfare support for evacuated people.

• Coordinate the provision of emergency food and medical supplies to isolated people and/or communities.

• Coordinate operations to assist the community to protect property. This may include;
  • Arranging resources for sandbagging operations.
  • Lifting or moving household furniture.
  • Lifting or moving commercial stock and equipment.

• Where possible, arrange for support (for example, accommodation and meals) for emergency service organisation members and volunteers assisting them.

• If NSW SES resources are available, assist with emergency fodder supply operations conducted by Agriculture and Animal Services.

• If NSW SES resources are available, assist the NSW Police Force, RMS and Council with road closure and traffic control operations.

• Exercise financial delegations relating to the use of emergency orders as laid down in the NSW SES Controllers’ Guide.

• Coordinate the collection of flood information for development of intelligence.

• Submit Situation Reports to the NSW SES Sydney Southern Region Headquarters and agencies assisting within the council area. These should contain information on;
  • Road conditions and closures.
  • Current flood behaviour.
  • Current operational activities.
  • Likely future flood behaviour.
  • Likely future operational activities.
  • Probable resource needs.

• Keep the Local Emergency Operations Controller advised of the flood situation and the operational response.

• Issue the ‘All Clear’ when flood operations have been completed.

Recovery

  i. Ensure that appropriate After Action Reviews are held after floods.
j. Provide appropriate representation to the recovery committee for the duration of the response phase of an event and as agreed during the recovery phase.

1.5.3 NSW SES Fairfield City Unit Members

a. Assist with preparedness activities.

b. Undertake training in flood and storm response operations.

c. Carry out flood response tasks. These may include;
   - The management of the NSW SES Fairfield City Local and Unit Headquarters Operations Centres.
   - Assist in the collection of flood information for the development of intelligence.
   - Flood rescue.
   - Evacuation.
   - Providing immediate welfare for evacuated people.
   - Delivery of warnings and information.
   - Resupply.
   - Sandbagging.
   - Lifting and/or moving household furniture and commercial stock.
   - Animal rescue.
   - Assisting in repairing or improving levees.
   - Assisting with road closure and traffic control operations.
   - Assisting with emergency fodder supply operations.

1.5.4 Fairfield Local Emergency Operations Controller (LEOCON)

a. Monitor flood operations.

b. Request and coordinate support to the NSW SES Incident Controller if requested to do so.

1.5.5 Fairfield Local Emergency Management Officer (LEMO)

a. Provide executive support to the LEMC and LEOCON in accordance with the Fairfield Local Emergency Management Plan.

b. At the request of the NSW SES Incident Controller, advise appropriate agencies and officers of the start of response operations.

1.5.6 Fairfield City Council

Preparedness

b. Establish and maintain floodplain risk management committees and ensure that key stakeholders are represented on such committees.

c. Provide all flood related studies to the NSW SES.

d. Maintain Dam Safety Emergency Plans for the Comin Place Detention Basin, Clear Paddock Creek Basin C, Clear Paddock Creek Basic W2 and Clear Paddock Creek Basic W3, Fairfield Golf Course Basin, Mimosa Rd Basin, Stockdale Reserve Basin, King Park Basin and Baosnjak Park Upstream Basin as well as provide copies to the NSW SES.

e. Provide information on the consequences of dam failure to the NSW SES for incorporation into planning and flood intelligence.

f. Maintain a plant and equipment resource list for the council area.

g. Work with NSW SES on the development and implementation of a community engagement and capacity building program.

h. Coordinate the development of warning services for catchments prone to flash flooding (small catchments), where appropriate.

i. Maintain and operate council-owned flood warning systems.

Response

j. At the request of the NSW SES Incident Controller, deploy personnel and resources for flood related activities within the limitations of personnel and resources available.

k. Close and reopen council roads (and other roads nominated by agreement with the RMS) and advise the NSW SES Incident Controller and the Police.

l. Provide information on the status of roads.

m. Provide filled sandbags to any area within the Fairfield LGA where flooding is expected; within the reasonable capacity for council’s personnel to undertake and the limitations of materials available.

n. In the event of evacuations, assist with making available and/or locating facilities for the domestic pets and companion animals of evacuees.

Recovery

o. Provide for the management of health hazards associated with flooding. This includes removing debris and waste.

p. Ensure premises are fit and safe for reoccupation and assess any need for demolition.

1.5.7 Agriculture and Animal Services Functional Area

a. When requested by NSW SES;
   
   ● Activate the Agriculture and Animal Services Supporting Plan as required and coordinate the provision of required services which may include;
• Co-ordinate response for all animals including pets, livestock and wildlife.
• Supply and delivery of emergency fodder.
• Emergency water replacement in certain circumstances.
• Coordinate the management of livestock and farm animals.
• Advice on dealing with dead and injured farm animals.
• Financial, welfare and damage assessment assistance to flood affected farmers.
• Co-ordinate the establishment of animal shelter facilities for the domestic pets and companion animals of evacuees.

1.5.8 **NSW Ambulance**

a. Assist with the evacuation of at risk communities (in particular elderly and/or infirm people).

b. Deploy ambulance resources to appropriate locations if access is expected to be lost.

c. Assist the NSW SES with flood rescue operations.

1.5.9 **Australian Government Bureau of Meteorology (The Bureau)**

a. Provide Flood Watches for the Georges River Basin.

b. Provide Flood Warnings, incorporating height-time predictions, for Georges River for the gauges of Liverpool (Weir) (AWRC No. 213400), Milperra (AWRC No. 213405) and Picnic Point (AWRC No. 213410).

c. Provide severe weather warnings when flash flooding is likely to occur.

1.5.10 **Child Care Centres and Preschools**

a. Childcare Centres are to be contacted by the NSW SES in the event of possible flooding or isolation.

b. When notified the child care centres and preschools should;

• Liaise with the NSW SES and arrange for the early release of children whose travel arrangements are likely to be disrupted by flooding and/or road closures.

• Assist with coordinating the evacuation of preschools and child care centres.

1.5.11 **Energy and Utility Services Functional Area**

a. When requested by NSW SES;

• Implement the Energy and Utilities Services Functional Area Supporting Plan.

• Where required, coordinate energy and utility services emergency management planning, preparation, response and recovery, including the restoration of services following a flood event.
- Coordinate advice to the NSW SES of any need to disconnect electricity, gas, water or wastewater services.
- Assist the NSW SES to identify infrastructure at risk of flooding for incorporation into planning and intelligence.
- Identify interdependencies between flooding and utility services due to secondary impacts of flooding and advise the NSW SES.
- Assist the NSW SES with advisory notices relating to hazards from utility services during flooding.
- Coordinate with utilities on restoration of services, including advisory notices relating to estimated time for restoration and mandatory safety checks prior to reconnection. Advise the NSW SES and the relevant recovery committee and coordinator of the timetable for restoration.

b. Local utility service distribution providers (electricity, gas, water, wastewater):
   - Provide advice to the NSW SES Fairfield City Local Controller of any need to disconnect power/gas/water/waste water supplies or of any timetable for reconnection.
   - Advise the NSW SES of any hazards from utility services during flooding.
   - Advise the public with regard to electrical hazards during flooding, and to the availability or otherwise of the electricity supply.
   - Clear or make safe any hazard caused by power lines or electricity distribution equipment.
   - Reconnect customers’ electrical/ gas/ water/waste water installations, when certified safe to do so and as conditions allow.
   - Assist the NSW SES to identify infrastructure at risk of flooding for incorporation into planning and intelligence.

1.5.12 Engineering Services Functional Area
   a. When requested by NSW SES;
      - Provide engineering advice regarding the integrity of damaged structures.
      - Assist the NSW SES with damage assessment.
      - Acquire and/or provide specialist technical engineering expertise.
      - Assist the NSW SES and councils with the assessment and operation of flood protection levees when requested.
      - Assist with property protection, including the construction or repair of levees.
      - Coordinate the restoration of critical public facilities.
b. When requested by the Recovery Coordinator:
   - Establish Recovery Centres by the procurement and fit-out of suitable properties.

1.5.13 **Environmental Services Functional Area**

a. When requested by NSW SES;
   - Implement the Environmental Services Functional Area (Enviroplan) Supporting Plan if required.

1.5.14 **Fire and Rescue NSW**

a. FRNSW responsibilities are primarily confined to the FRNSW Fire District. Any deployment of FRNSW resources to assist NSW SES in flood events rests with the respective FRNSW Commander which must be a Senior Officer.

b. The FRNSW Commander will assess the capability of FRNSW to assist NSW SES in the following tasks:
   - Warning and/or evacuation of at risk communities.
   - Monitoring / reconnaissance of flood prone areas.
   - Resupply of isolated communities and/or properties.
   - Property protection tasks including sandbagging.
   - Provide resources for pumping flood water out of buildings and from low-lying areas.
   - Cleanup operations, including the hosing out of flood affected properties.
   - Coordinate the deployment of fire resources to communities within Fire and Rescue NSW fire districts if access is expected to be lost in consultation with the NSW SES.

c. FRNSW will use its best endeavours to deploy appliances and or resources into locations where access is expected to be lost.

1.5.15 **Forestry Corporation of NSW**

a. Close and evacuate at risk camping grounds in State Forest managed areas.

b. Close and reopen Forestry Corporation of NSW roads when affected by flood waters and advise the NSW SES of its status.

c. Facilitate the safe reliable access of emergency resources on Forestry Corporation managed roads.

d. Assist the NSW SES with identification of road infrastructure at risk of flooding.

e. Manage traffic in Forestry Corporation of NSW roads.
f. Assist the NSW SES with the communication of warnings and information provision to the public through variable message signs and other appropriate means.

1.5.16 Health Services Functional Area

a. When requested by NSW SES;
   - Activate Healthplan if required.
   - Ensure that appropriate business continuity plans are developed for essential health infrastructure and are activated during floods.
   - Provide medical support to the NSW SES.
   - Establish health surveillance in affected areas.
   - Assess potential public health risks that either acutely endanger the health of human populations or are thought to have longer term consequences.
   - Provide environmental health advice.
   - Provide public health warnings and advice to affected communities.
   - Provide psychological counselling support to the community and emergency response workers impacted, via NSW Health Mental Health Division.
   - Assist the NSW SES with the warning and evacuation of public hospitals, private hospitals and residential aged care facilities.
   - Undertake assessment of at risk patients for mental health and drug and alcohol dependant persons, dialysis, community health clients and oxygen dependant persons in the community, known to the health service.

1.5.17 NSW Office of Water

a. Collect and maintain flood data including data relating to flood heights, velocities and discharges.

b. Provide the Bureau of Meteorology and NSW SES real-time or near real-time access to river height gauges and height data for the development of official flood warnings.

c. Provide flow rating charts for river height gauges.

d. Manage (with technical support from OEH) the approval process under the Water Act 1912 and Water Management Act 2000 for flood control works (earthworks, embankments and levees which can affect the distribution of floodwaters) including;
   - Assessment and approval of flood control works (including flood mitigation works) in rural areas designated under the Acts.
   - Use of floodplain management plans prepared by OEH in rural areas designated under the Acts to assess flood control work approvals.
• Giving the NSW SES access to relevant studies regarding flooding and studies supporting floodplain management plans prepared by OEH including flood studies, floodplain risk management studies and flood behaviour investigations.

1.5.18 **NSW Police Force**

a. Assist the NSW SES with the delivery of evacuation warnings and evacuation orders.
b. Assist the NSW SES with the conduct of evacuation operations.
c. Conduct road and traffic control operations in conjunction with council and/or RMS.
d. Coordinate the registration of evacuees.
e. Secure evacuated areas.

1.5.19 **NSW Rural Fire Service**

a. Provide personnel in rural areas and villages to;
   • Inform the NSW SES Incident Controller about flood conditions and response needs in their own communities, and
   • Disseminate flood information.
b. Provide personnel and high-clearance vehicles for flood related activities.
c. Assist the NSW SES with the delivery of evacuation warnings and evacuation orders.
d. Assist the NSW SES with the conduct of evacuations.
e. Provide equipment for pumping flood water out of buildings and from low-lying areas.
f. Provide back-up radio communications.
g. Assist with clean-up operations, including the hosing of flood affected properties.
h. Deploy fire resources to appropriate locations if access is expected to be lost.

1.5.20 **Office of Environment and Heritage**

a. Assist the NSW SES gain access to relevant studies regarding flooding, including Flood Studies and Floodplain Risk Management Studies undertaken under the Floodplain Management Program.
b. Assist the NSW SES in obtaining required outputs from Flood Studies and Floodplain Risk Management Studies under the Floodplain Management Program which assist the NSW SES in effective emergency response planning and incorporating information into the NSW Floods Database.
c. Coordinate the collection of post event flood data, in consultation with the NSW SES.
d. Provide specialist advice to the NSW SES on flood related matters on;
   - The identification of flood risks.

e. Collect and maintain flood data relating to flood heights, velocities and discharges in coastal areas of NSW (through a contract with MHL as discussed separately).

f. Provide data to the Bureau of Meteorology and NSW SES real-time or near real-time access to river height gauges and height data for the development of official flood warnings (through a contract with MHL as described in the Response section of this plan).

g. Assist the NSW SES in the exercising of this Flood Sub Plan.

h. **Parks and Wildlife Service**
   - Close and reopen Parks and Wildlife Service roads when affected by flood waters and advise the NSW SES of its status.
   - Facilitate the safe reliable access of emergency resources on National Parks and Wildlife Service managed roads.
   - Assist the NSW SES with identification of road infrastructure at risk of flooding.
   - Manage traffic on Parks and Wildlife Service roads.
   - Assist the NSW SES with the communication of warnings and information provision to the public through variable message signs and other appropriate means.

1.5.21 **Owners of Prescribed Dams within or upstream of Fairfield City**

<table>
<thead>
<tr>
<th>Dam Name</th>

</tr>
<tr>
<td>Bosnjak Park Upstream Basin</td>
<td>Fairfield City Council</td>
</tr>
</tbody>
</table>

a. Maintain and operate the Dam Failure Warning System for their Dam(s).

b. Contribute to the development and implementation of community engagement and capacity building programs on flooding.
c. Consult with NSW SES on the determination of dam failure alert levels and notification arrangements when developing Dam Safety Emergency Plans.

d. Maintain a Dam Safety Emergency Plan and provide copies to the NSW SES.

e. Provide information on the consequences of dam failure to the NSW SES for incorporation into planning and flood intelligence.

f. Close and evacuate at risk camping grounds/recreational areas within their managed areas.

1.5.22 Public Information Services Functional Area

a. When requested by NSW SES:
   - Assist the NSW SES in the establishment and operation of a Joint Media Information Centre.

1.5.23 Roads and Maritime Services

a. Manage traffic on state roads, state highways and waterways affected by flood waters and advise the NSW SES of their status.

b. Facilitate the safe reliable access of emergency resources on RMS managed roads.

c. Assist the NSW SES with identification of road infrastructure at risk of flooding.

d. Assist in Traffic management associated with evacuations where necessary.

e. Enter state road closure information into the Live Traffic site.

f. Assist the NSW SES and local councils with the communication of warnings and information provision to the public through variable message signs.

g. Cooperate with the South West Metropolitan Transport Services Functional Area Coordinator.

1.5.24 School Administration Offices (including Catholic Education Office Southern Region Office, Department of Education South Western Sydney and Private Schools)

a. Liaise with the NSW SES and arrange for the early release of students whose travel arrangements are likely to be disrupted by flooding and/or road closures (or where required, for students to be moved to a suitable location until normal school closing time).

b. Pass information to school bus drivers/companies and/or other schools on expected or actual impacts of flooding.

c. Assist with coordinating the evacuation of schools when flooding or isolation is expected to occur.
d. Provide space in schools for evacuation centres where necessary.

1.5.25 **Telecommunication Services Functional Area**

a. When requested by NSW SES;
   - Coordinate the restoration of telephone facilities damaged by flooding.
   - Assist the NSW SES to identify infrastructure at risk of flooding for incorporation into planning and intelligence.

1.5.26 **The South West Transport Services Functional Area Coordinator (TSFAC)**

a. The TSFAC will assist NSW SES, emergency services and other functional areas through the provision and coordination of traffic and transport operations as consistent with the roles of Transport organisations, including;
   - The movement of emergency equipment and personnel.
   - The movement of emergency supplies and goods, including water, fuel and food.
   - The evacuation of people and animals.
   - Assistance for medical transport.
   - Transportation of animals and infectious material/dangerous goods.
   - Maintaining and operating a transport route advisory service to the NSW SES, emergency services organisations and other Functional Areas and members of the community.

1.5.27 **NSW Train Link and Sydney Trains**

a. Operate rail services through the Fairfield including the management of railway services affected by flood waters and advise the NSW SES.

b. Assist the NSW SES with the movement or evacuation of people during flood response operations if required.

c. Convey flood information and flood warnings to passengers and travellers on NSW and Sydney trains.

d. Cooperate with, and assist the NSW SES Local Controller in relation to public safety during flood emergencies.

e. Cooperate with the South West Metropolitan Transport Services Functional Area Coordinator.

1.5.28 **Welfare Services Functional Area**

a. When requested by NSW SES;
   - Establish and manage evacuation centres, and provide disaster welfare services from recovery centres.
• Administer the Personal Hardship and Distress component of the NSW Disaster Relief Scheme established to provide financial assistance to people affected by emergencies.
PART 2 - PREPAREDNESS

2.1 MAINTENANCE OF THIS PLAN

2.1.1 The NSW SES Fairfield City Local Controller will maintain the currency of this plan by;

a. Ensuring that all agencies, organisations and officers mentioned in it are aware of their roles and responsibilities.

b. Conducting exercises to test arrangements.

c. Reviewing the contents of the plan;
   - After each flood operation.
   - When significant changes in land-use or community characteristics occur.
   - When new information from flood studies become available.
   - When flood control or mitigation works are implemented or altered.
   - When there are changes that alter agreed plan arrangements.

2.1.2 The plan is to be reviewed no less frequently than every five years.

2.2 FLOODPLAIN RISK MANAGEMENT

2.2.1 The NSW SES Fairfield City Local Controller will ensure that;

a. NSW SES participates in local floodplain risk management committee activities when those committees are formed, in accordance with the protocols outlined in the NSW SES Controllers’ Guide.

b. The NSW SES Sydney Southern Region Headquarters is informed of involvement in floodplain risk management activities.

2.3 DEVELOPMENT OF FLOOD INTELLIGENCE

2.3.1 Flood intelligence describes flood behaviour and its effects on the community.

2.3.2 The NSW SES maintains a centralised flood intelligence system.

2.4 DEVELOPMENT OF WARNING SYSTEMS

2.4.1 The NSW SES establishes total flood warning systems for areas affected by flooding. This requires;

a. An identification of the potential clients of flood warning information at different levels of flooding (i.e. who would be affected in floods of differing severities).

b. Available information about the estimated impacts of flooding at different heights.
c. Identification of required actions and the amounts of time needed to carry them out.

d. Appropriate means of disseminating warnings to different clients and at different flood levels.

2.5 COMMUNITY RESILIENCE

2.5.1 The community needs to be as prepared as emergency agencies for the impact of all hazards (6) including flooding. This may include:

a. Understanding the potential risk and impact of flooding;

b.Preparing homes and property to reduce the impact of flooding;

c. Understanding warnings and other triggers for action and the safest actions to take in a flood;

d. Households, institutions and businesses developing plans to manage flood risks, sharing and practicing this with family, friends, employees and neighbours;

e. Having an emergency kit;

f. Being involved in local emergency planning processes.

2.5.2 As the combat agency, NSW SES has the primary responsibility for the collation, assessment and public dissemination of information relating to flooding (9). To do this, NSW SES will require assistance from other agencies, particularly local government councils, dam owners, and the Bureau in the development and delivery of materials.

2.5.3 The NSW SES Fairfield City Local Controller, with the assistance of the Fairfield City Council, the NSW SES Sydney Southern Region Headquarters and NSW SES State Headquarters, is responsible for the collation, assessment and public dissemination of information relating to flooding (3).

2.5.4 A range of tailored strategies to be employed with NSW communities include:

a. Dissemination of flood-related brochures and booklets in flood liable areas.

b. Talks and displays orientated to community organisations, businesses and schools.

c. Publicity given to this plan and to flood-orientated NSW SES activities through local media outlets, including articles in local newspapers about the flood threat and appropriate responses.

2.6 TRAINING

2.6.1 Throughout this document there are references to functions that must be carried out by the members of the NSW SES Fairfield City Unit(s). The NSW SES Fairfield City Local Controller is responsible for ensuring that the members are;
a. Familiar with the contents of this plan.

b. Trained in the skills necessary to carry out the tasks allocated to the NSW SES.

2.7 RESOURCES

2.7.1 The NSW SES Fairfield City Local Controller is responsible for maintaining the condition and state of readiness of NSW SES equipment and the NSW SES Fairfield City Local Headquarters.
PART 3 - RESPONSE

CONTROL

3.1 CONTROL ARRANGEMENTS

3.1.1 The NSW SES is the legislated Combat Agency for floods and is responsible for the control of flood operations. This includes the coordination of other agencies and organisations for flood management tasks.

3.1.2 The Local EMPLAN will operate to provide support as requested by the NSW SES Incident Controller.

3.2 OPERATIONAL MANAGEMENT

3.2.1 NSW SES utilises the Australasian Inter-service Incident Management System (AIIMS), which is based on five principles;

   a. Flexibility;
   b. Functional management;
   c. Management by objectives;
   d. Unity of Command; and
   e. Span of control.

3.2.2 AIIMS provides for different incident levels based on the complexity of management.

3.2.3 The Local Government Area may be divided into sectors and divisions to manage the flood event (divisions are usually a group of sectors).

3.2.4 Sectors and divisions may be based on floodplain classifications, geographical, physical or functional boundaries. A town, city or suburb may be one sector or split into several sectors and divisions.

3.3 START OF RESPONSE OPERATIONS

3.3.1 This plan is always active to ensure that preparedness actions detailed in this plan are completed.

3.3.2 Response operations will begin;

   a. On receipt of a Bureau of Meteorology Preliminary Flood Warning, Flood Warning, Flood Watch, Severe Thunderstorm Warning or a Severe Weather Warning for flash flooding.
   b. On receipt of a dam failure alert.
   c. When other evidence leads to an expectation of flooding within the council area.
3.3.3 Contact with the Bureau of Meteorology to discuss the development of flood warnings will normally be through the NSW SES Sydney Southern Region Headquarters and/or NSW SES State Headquarters.

3.3.4 The following persons and organisations will be advised of the start of response operations regardless of the location and severity of the flooding anticipated:

a. NSW SES Sydney Southern Region Headquarters.

b. NSW SES Fairfield City Controller(s).

c. NSW SES Fairfield City Unit.

d. Fairfield Local Emergency Operations Controller (for transmission to the NSW Police Force).

e. Fairfield Local Emergency Management Officer (for transmission to appropriate council officers and departments).

f. Fairfield City Council Mayor.

g. Other agencies listed in this plan will be advised by the Local Emergency Management Officer on the request of the NSW SES Incident Controller and as appropriate to the location and nature of the threat.

3.4 RESPONSE STRATEGIES

3.4.1 The main response strategies for NSW SES flood operations include;

a. Information Provision and Warning

• Provision of warnings, information and advice to communities.

• Inform the community regarding the potential impacts of a flood and what actions to undertake in preparation for flooding.

• Provide timely and accurate information to the community.

b. Property protection

• Protect the property of residents and businesses at risk of flood damage where time and resources permit including:

• Assistance with property protection by way of sandbagging and the lifting or transporting of furniture, personal effects, and commercial stock.

• Assistance with the protection of essential infrastructure.

c. Evacuation

• Evacuation is a risk management strategy that may be used to mitigate the effects of an emergency on a community. It involves the movement of people to a safer location and their return. For an evacuation to be effective it must be appropriately planned and implemented (7).
d. Flood Rescue
   - The rescue or safe retrieval of persons or animals trapped by floodwaters.

e. Resupply
   - Minimise disruption upon the community by resupplying towns and villages which have become isolated as a consequence of flooding.
   - Ensure supplies are maintained to property owners by coordinating the resupply of properties which have become isolated as a consequence of flooding.

3.4.2 The NSW SES Incident Controller will select the appropriate response strategy to deal with the expected impact of the flood in each sector and/or community. The impact may vary so a number of different strategies may need to be selected and implemented across the whole operational area. The available strategies for each sector and/or community are maintained by the NSW SES.

3.4.3 Supporting agency strategies may include;
   a. Protect the community from incidents involving fire and hazardous materials.
   b. Maintain the welfare of communities and individuals affected by the impact of a flood.
   c. Minimise disruption to the community by ensuring supply of essential energy and utility services.
   d. Ensure coordinated health services are available to and accessible by the flood affected communities.
   e. Maintain the welfare of animals affected by the impact of a flood.

3.5 OPERATIONS CENTRES

3.5.1 The NSW SES Fairfield Operations Centre is located at the Fairfield Unit Headquarters

3.5.2 The Fairfield City Emergency Operations Centre will be established by the LEOCON.
3.6 **LIAISON**

3.6.1 Any agency with responsibilities identified in this plan may be requested by the NSW SES to provide liaison (including a liaison officer where necessary) to the NSW SES Fairfield City Operations Centre, or designated Emergency Operations Centre.

3.6.2 In accordance with NSW EMPLAN, Liaison Officers will;

   a. Maintain communication with and convey directions/requests to their organisation or functional area;

   b. Provide advice on the status, resource availability, capabilities, actions and requirements of their organisation or functional area, and

   c. Where appropriate, have the authority to deploy the resources of their parent organisation at the request of the NSW SES Incident Controller.

3.7 **END OF RESPONSE OPERATIONS**

3.7.1 When the immediate danger to life and property has passed the NSW SES Operational Area Commander will issue an 'All Clear' message signifying that response operations have been completed. The message will be distributed through the same media outlets as earlier evacuation messages. The relevant Controller will also advise details of recovery coordination arrangements, arrangements made for clean-up operations prior to evacuees being allowed to return to their homes, and stand-down instructions for agencies not required for recovery operations.

**PLANNING**

3.8 **COLLATING SITUATIONAL INFORMATION**

**Strategy**

3.8.1 The NSW SES maintains and records situational awareness of current impacts and response activities.

**Actions**

3.8.2 The NSW SES Fairfield City Local Headquarters collates information on the current situation in the Fairfield LGA and incorporates in Situation Reports.

3.8.3 The NSW SES Sydney Southern Region Headquarters collates Region-wide information for inclusion in NSW SES Region Situation Reports.

3.8.4 Sources of situational information during times of flooding are;

   a. **Agency Situation Reports.** Agencies and functional areas provide regular situation reports (SITREPs) to the NSW SES.

   b. **Active Reconnaissance.** The NSW SES Incident Controller is responsible for coordinating the reconnaissance of impact areas, recording and
communicating observations. Reconnaissance can be performed on the ground and using remote sensing (more commonly aerial).

c. The Bureau of Meteorology’s Flood Warning Centre provides river height and rainfall information, data is available on the website http://www.bom.gov.au/nsw/flood/.

d. Manly Hydraulics Laboratory (a business unit within NSW Public Works) automated river watch system funded by the Office of Environment and Heritage. This system provides river height and rainfall readings for a number of gauges in the Fairfield LGA. Recent data from this system is available on the Manly Hydraulic Laboratory website: http://www.mhl.nsw.gov.au. A history of area floods is also available upon request via the website.

e. NSW Office of Water. This office advises flow rates and rates of rise for the Orphan School and Prospect Creek. Daily river reports containing information on gauge heights and river flows are available from the website: http://waterinfo.nsw.gov.au/.

f. NSW SES Sydney Southern Region Headquarters. The Region Headquarters provides information on flooding and its consequences, including those in nearby council areas (this information is documented in Bulletins and Situation Reports).

g. Fairfield City Council

3.8.5 During flood operations sources of information on roads closed by flooding include;

a. Fairfield City Council website.
b. Fairfield and Cabramatta Police Local Area Commands.
c. Roads and Maritime Services (website and/or telephone service).
d. NSW SES Sydney Southern Region Headquarters.
e. NSW SES Fairfield City Local Headquarters.

3.8.6 Situational information relating to consequences of flooding should be used to verify and validate NSW SES Flood Intelligence records.

3.9 PROVISION OF FLOOD INFORMATION AND WARNINGS

Strategy

3.9.1 The NSW SES Fairfield City Local Headquarters provides advice to the NSW SES Sydney Southern Region Headquarters on current and expected impacts of flooding in the Fairfield LGA.

3.9.2 The NSW SES Sydney Southern Region Headquarters issues NSW SES Flood Bulletins, NSW SES Livestock and Equipment Warnings, Evacuation Warnings
and Evacuation Orders to media outlets and agencies on behalf of all NSW SES units in the Region.

Actions

3.9.3 The NSW SES Incident Controller will ensure that the NSW SES Operational Area Commander is regularly briefed on the progress of operations.

3.9.4 NSW SES Fairfield City Local Headquarters operations staff will be briefed regularly so that they can provide information in response to inquiries received in person or by other means such as phone or fax.

3.9.5 Bureau of Meteorology Severe Thunderstorm Warning. These are issued direct to the media by the Bureau when severe thunderstorms are expected to produce dangerous or damaging conditions, including flash flooding. Severe thunderstorms are usually smaller in scale than events covered by Flood Watches and Severe Weather Warnings.

3.9.6 Bureau of Meteorology Severe Weather Warnings for Flash Flooding. These are issued direct to the media by the Bureau and provide a warning of the possibility for flash flooding as a result of intense rainfall. These warnings are issued when severe weather is expected to affect land based communities with 6 to 24 hours. Severe Weather Warnings may also include other conditions such as Damaging Winds.

3.9.7 Bureau of Meteorology Flood Watches. Flood Watches are issued by the Bureau to advise people of the potential for flooding in a catchment area based on predicted or actual rainfall. Flood Watches will be included in NSW SES Flood Bulletins issued by the NSW SES Sydney Southern Region Headquarters.

3.9.8 Bureau of Meteorology Flood Warnings. The NSW SES Sydney Southern Region Headquarters will send a copy of Bureau Flood Warnings to the NSW SES Fairfield City Unit. On receipt the NSW SES Incident Controller will provide the NSW SES Sydney Southern Region Headquarters with information on the estimated impacts of flooding at the predicted heights for inclusion in NSW SES Region Flood Bulletins.

3.9.9 NSW SES Livestock and Equipment Warnings. Following heavy rain or when there are indications of significant creek or river rises (even to levels below Minor Flood heights), the NSW SES Incident Controller will advise the NSW SES Sydney Southern Region Headquarters which will issue NSW SES Livestock and Equipment Warnings.

3.9.10 NSW SES Local Flood Advices. The NSW SES Incident Controller may issue Local Flood Advices for locations not covered by Bureau Flood Warnings. They may be provided verbally in response to phone inquiries but will normally be incorporated into NSW SES Region Flood Bulletins.

3.9.11 NSW SES Flood Bulletins. The NSW SES Sydney Southern Region Headquarters will regularly issue NSW SES Flood Bulletins which describe information on the estimated impacts of flooding at the predicted heights (using information
3.9.12 **NSW SES Evacuation Warnings and Evacuation Orders.** These are usually issued to the media by the NSW SES Operational Area Commander on behalf of the NSW SES Incident Controller.

3.9.13 **Special Warnings.** The system for disseminating evacuation warnings is as follows:

a. General evacuation warnings will be distributed by the NSW SES Sydney Southern Region Headquarters.

b. Specific evacuation warnings may be prepared by the NSW SES Incident Controller and passed to the Region Headquarters for dissemination to media outlets.

3.9.14 **Dam Failure Alerts.** Dam failure alerts are issued to NSW SES by the dam owner, in accordance with arrangements in the Dam Safety Emergency Plan (DSEP), the system involves the Dam Owner notifying NSW SES State Headquarters Operations Communications Centre, who in turn distribute the warning to the NSW SES Region Headquarters and NSW SES Unit Headquarters.

3.9.15 A flow chart illustrating the notification arrangements for potential dam failure is shown in Attachment 2.

3.9.16 Dam failure alert levels are set in consultation with the NSW SES and are used to trigger appropriate response actions. The conditions that define each of the alert levels are listed in the relevant DSEP. Responses escalate as the alert level migrates from white to amber to red. Table 1 briefly outlines example defining conditions and appropriate NSW SES responses associated with each alert.
### Table 1: Dam Failure Alert Levels

<table>
<thead>
<tr>
<th>Alert Level</th>
<th>Example Defining Condition</th>
<th>NSW SES Response</th>
<th>NSW SES Warning Product</th>
</tr>
</thead>
<tbody>
<tr>
<td>White</td>
<td>May be a structural anomaly.</td>
<td>Implements notification flowchart.</td>
<td>This is a preliminary alert to assist the NSW SES in its preparation. This is not a public alert.</td>
</tr>
<tr>
<td></td>
<td>May be increased monitoring in response to a heavy rainfall event</td>
<td>Check operational readiness.</td>
<td></td>
</tr>
<tr>
<td>Amber</td>
<td>Failure possible if storage level continues to rise or structural anomaly not fixed</td>
<td>Implements notification flowchart.</td>
<td>NSW SES Evacuation Warning</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Warn downstream population at risk to prepare to evacuate</td>
<td></td>
</tr>
<tr>
<td>Red</td>
<td>Failure imminent or occurred</td>
<td>Implements notification flowchart.</td>
<td>NSW SES Evacuation Order</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Evacuation of downstream populations</td>
<td></td>
</tr>
</tbody>
</table>

Note: Some DSEPs will have alert levels that proceed directly from White to Red. This is the case if adequate time does not exist between the three alert levels to evacuate the downstream population at risk. The decision to omit the Amber Alert level, and the general setting of Alert levels should be undertaken in consultation with the NSW SES.

3.9.17 The NSW SES / Dam Owner will disseminate warnings to the population at risk of dam failure (these arrangements are specific to each dam, are negotiated between the Dam Owner and NSW SES, and are documented in the DSEP).

3.9.18 Special arrangements apply in the case of severe flooding that may have the potential to cause the failure of Prospect Dam. Details of these arrangements are maintained by the NSW SES.

3.9.19 **Standard Emergency Warning Signal (SEWS).** This signal may be played over radio and television stations to alert communities to Evacuation Warnings, Evacuation Orders, Special Warnings or Dam-Failure Warnings. Approval to use the signal is associated with who approves the warning/order message.

3.9.20 **The Public Information and Inquiry Centre (PIIC)** (operated by the NSW Police Force) will answer calls from the public regarding registered evacuees.

3.9.21 **The Disaster Welfare Assistance line** is a central support and contact point for disaster affected people inquiring about welfare services advice and assistance. This normally operates during business hours, but can be extended when required.

3.9.22 **The RMS Transport Information Line** will provide advice to callers on the status of roads. The RMS website also lists road closure information.

3.9.23 **Fairfield City Council** will provide information on the status of roads.

3.9.24 Collation and dissemination of road information is actioned as follows:
a. As part of Situation Reports, the NSW SES Incident Controller provides road status reports for main roads in the council area to the NSW SES Sydney Southern Region Headquarters.

b. The NSW SES Sydney Southern Region Headquarters distributes information on main roads to NSW SES units, media outlets and agencies as part of NSW SES Flood Bulletins.

**OPERATIONS**

**3.10 AIRCRAFT MANAGEMENT**

3.10.1 Aircraft can be used for a variety of purposes during flood operations including evacuation, rescue, resupply, reconnaissance and emergency travel.

3.10.2 Air support operations will be conducted under the control of the NSW SES Operational Area Commander, which may allocate aircraft to units if applicable.

3.10.3 NSW SES maintains the following information for the Fairfield Council area;

a. Locations of suitable helicopter landing points.

b. Locations of suitable airports and records detailing aircraft size and type that can land at airports.

c. Intelligence on when access to these locations is expected to be lost.

**3.11 ASSISTANCE FOR ANIMALS**

3.11.1 Matters relating to the welfare of livestock, companion animals and wildlife are to be referred to Agriculture and Animal Services Functional Area.

3.11.2 Requests for emergency supply and/or delivery of fodder to stranded livestock, or for livestock rescue, are to be referred to Agriculture and Animal Services Functional Area.

3.11.3 Requests for domestic animal rescue should be referred to the NSW SES.

**3.12 COMMUNICATION SYSTEMS**

3.12.1 The primary means of communications between fixed locations is by telephone, email and facsimile.

3.12.2 The primary means of communication to and between deployed NSW SES resources is by GRN and mobile phone.

3.12.3 All liaison officers will provide their own communication links back to their parent agencies.

3.12.4 All other organisations will provide communications as necessary to their deployed field teams.

3.12.5 Back-up communications are provided as follows:
a. The NSW SES Fairfield Local Headquarters operates a station on the NSW SES Sydney Southern Region strategic radio network.

3.13 PRELIMINARY DEPLOYMENTS

3.13.1 When flooding is expected to be severe enough to cut road access to towns, within towns and/or rural communities, the NSW SES Incident Controller will ensure that resources are in place for the distribution of foodstuffs and medical supplies to the areas that could become isolated.

3.13.2 When access between locations is expected to be cut, the NSW SES Incident Controller will advise appropriate agencies so that resources (including sandbags, fire fighting appliances, ambulances, etc.) are deployed to ensure that operational capability is maintained.

3.14 ROAD AND TRAFFIC CONTROL

3.14.1 A number of roads within the council area are affected by flooding. NSW SES maintains details of these roads.

3.14.2 The council closes and re-opens its own roads.

3.14.3 The NSW Police Force has the authority to close and re-open roads but will normally only do so (if the Council or the RMS have not already acted) if public safety requires such action.

3.14.4 When resources permit, the NSW SES assists Council, RMS or the Police by erecting road closure signs and barriers.

3.14.5 In flood events, the NSW SES Incident Controller may direct the imposition of traffic control measures. The entry into flood affected areas will be controlled in accordance with the provisions of the State Emergency Service Act, 1989 (Part 5, Sections 19, 20, 21 and 22) and the State Emergency Rescue Management Act, 1989 (Part 4, Sections 60KA, 60L and 61).

3.14.6 Police, RMS or Council officers closing or re-opening roads or bridges affected by flooding are to advise the NSW SES Fairfield City Local Headquarters, which will then provide a road information service to local emergency services, the public and the NSW SES Sydney Southern Region Headquarters. All such information will also be passed to the Police, RMS and the Council.

3.15 STRANDED TRAVELLERS

3.15.1 Flood waters can strand travellers. Travellers seeking assistance will be referred to the Welfare Services Functional Area for the arrangement of emergency accommodation.
3.16 MANAGING PROPERTY PROTECTION OPERATIONS

**Strategy**

3.16.1 Protect the property of residents and businesses at risk of flood damage.

**Actions**

3.16.2 The NSW SES is the responsible agency for the coordination of operations to protect property.

3.16.3 Property may be protected from floods by;

a. Lifting or moving of household furniture.

b. Lifting or moving commercial stock and equipment.

c. Sandbagging to minimise entry of water into buildings.

3.16.4 The NSW SES maintains stocks of sandbags and a small amount of the Pallet Barrier System.

3.16.5 Property protection options are however very limited in the Fairfield LGA due to the large number of properties that can be affected and the depth of floodwaters arising from severe flooding on the Georges River.

3.17 MANAGING FLOOD RESCUE OPERATIONS

**Strategy**

3.17.1 Rescue of people and animals from floods.

**Actions**

3.17.2 The NSW SES Sydney Southern Region Headquarters controls flood rescue in Fairfield LGA during a flood emergency.

3.17.3 Flood rescues, may be carried out by accredited units in accordance with appropriate standards.

3.17.4 Additional flood boats and crews can be requested through the NSW SES Sydney Southern Region Headquarters.

3.17.5 There may be some residual population which did not evacuate during the early stages of flooding and which require rescue.

3.18 MANAGING EVACUATION OPERATIONS

**Strategy**

3.18.1 When there is a risk to public safety, evacuation is the primary strategy. Circumstances may include;

a. Evacuation of people when their homes or businesses are likely to flood.
b. Evacuation of people who are unsuited to living in isolated circumstances, due to flood water closing access.

c. Evacuation of people where essential energy and utility services are likely to fail, have failed or where buildings have been made uninhabitable.

**Actions**

3.18.2 The evacuation operation will have the following stages:

a. Decision to evacuate.

b. Mobilisation (mobilisation may begin prior to the decision to evacuate).

c. Evacuation Warning delivery.

d. Evacuation Order delivery.

e. Withdrawal.

f. Shelter.

g. Return.

3.18.3 During floods evacuations will be controlled by the NSW SES. Small-scale evacuations will be controlled by the NSW SES Incident Controller. Should the scale of evacuation operations be beyond the capabilities of local resources control may be escalated to the next operational command level.

**Decision to evacuate**

3.18.4 In most cases the decision to evacuate rests with the NSW SES Incident Controller who exercises his/her authority in accordance with Section 22(1) of The State Emergency Service Act 1989. However, the decision to evacuate will usually be made after consultation with the NSW SES Operational Area Commander and the Local Emergency Operations Controller.

3.18.5 In events that require large scale evacuations, the decision to evacuate must be escalated to the Operational Area Commander or the State Controller.

3.18.6 Some people will make their own decision to evacuate earlier and move to alternate accommodation, using their own transport. This is referred to as self-managed evacuation (7).

**Mobilisation**

3.18.7 The NSW SES Incident Controller will request the following personnel for doorknock teams for designated Sectors/locations:

a. NSW SES Fairfield City Unit members.

b. NSW RFS members via the RFS Fire Control Officer.

c. Local Police Force officers via the local area commands.
3.18.8 The NSW SES Operational Area Commander will request any additional personnel required to assist with doorknock teams using;
   a. NSW SES members from the NSW SES Sydney Southern Region and surrounding NSW SES Regions.
   b. FRNSW personnel arranged via the FRNSW Liaison Officer.
   c. RFS personnel arranged via the RFS Liaison Officer.
3.18.9 The NSW SES Incident Controller will request the Chairperson of the LEMC to provide Council personnel to assist with traffic coordination within Sector(s)/Community.
3.18.10 The NSW SES Incident Controller will arrange liaison officers for Sector Command Centres.
3.18.11 The NSW SES Operational Area Commander will request the required number of buses for Sectors via the Transport Services Functional Area.

**Delivery of Evacuation Warnings and Evacuation Orders**

3.18.12 The NSW SES will advise the community of the requirements to evacuate. The NSW SES will issue an **Evacuation Warning** when the intent of an NSW SES Incident Controller is to warn the community of the need to prepare for a possible evacuation.
3.18.13 The NSW SES will issue an **Evacuation Order** when the intent of the NSW SES Incident Controller is to instruct a community to immediately evacuate in response to an imminent threat.
3.18.14 The NSW SES Incident Controller will distribute Evacuation Warnings and Evacuation Orders to;
   a. Sector/Division Command Centres (where established).
   b. Fairfield Local Emergency Operations Centre.
   c. Fairfield City Council.
   d. Fairfield and Cabramatta Police Local Area Commands.
   e. Cumberland Zone Rural Fire Service Control Centre.
   f. Local radio Stations.
   g. Other local agencies and specified individuals.
3.18.15 The NSW SES Operational Area Commander will distribute Evacuation Warnings and Evacuation Orders to;
   a. The NSW SES State Operations Centre.
   b. The NSW SES Incident Controller.
   c. Metropolitan media outlets via the Joint Media Information Centre.
   d. Affected communities via dial-out warning systems where installed or applicable.
3.18.16 Evacuation Warnings and Evacuation Orders may be delivered through;
   a. Radio and television stations.
   b. Doorknocking by emergency service personnel.
   c. Public address systems (fixed or mobile).
   d. Telephony-based systems (including Emergency Alert).
   e. Two-way Radio.

3.18.17 The Standard Emergency Warning Signal (SEWS) may be used to precede all Evacuation Orders broadcast on Radio Stations.

3.18.18 Sector Commanders, where established, will distribute Evacuation Orders via Emergency Service personnel in doorknock teams to areas under threat of inundation.

3.18.19 Doorknock teams will work at the direction of;
   a. The Sector Commander if a Sector Command Centre is established.
   b. The relevant Division Commander where a Sector Command Centre has not been established.

3.18.20 Field teams conducting doorknocks will record and report back the following information to their Sector Commander/Division Commander/Incident Controller;
   a. Addresses and locations of houses doorknocked and/or evacuated.
   b. The number of occupants.
   c. Details of support required (such as transport, medical evacuation, assistance to secure house and/or property and raise or move belongings).
   d. Details of residents who refuse to comply with the Evacuation Order.

3.18.21 Refusal to evacuate. Field teams should not waste time dealing with people who are reluctant or refuse to comply with any Evacuation Order. These cases are to be referred to the NSW Police Force.

Withdrawal

3.18.22 Evacuations will generally be carried out in stages starting from the lowest areas, low flood islands and low trapped perimeters; and progressively from higher areas.

3.18.23 The most desirable method of evacuation is via road using private transport. This may be supplemented by buses for car-less people. However, other means of evacuation may also be used if available and as necessary (e.g. by foot, rail, air).

3.18.24 Evacuees who require emergency accommodation or disaster welfare assistance will be directed to designated evacuation centres. Evacuees who
have made their own accommodation arrangements will not be directed to evacuation centres. It is not possible to determine in advance how many will fall into this category.

3.18.25 Evacuees will:

a. Move under local traffic arrangements from the relevant Sectors/Community. via managed evacuation routes;

b. Continue along the suburban/regional/rural road network to allocated Evacuation Centres.

3.18.26 **Health Services.** The Health Services Functional Area will coordinate the evacuation of hospitals, health centres and aged care facilities (including nursing homes).

3.18.27 **Schools.** School administration offices (Department of Education, Catholic Education Office and Private Schools) will coordinate the evacuation of schools if not already closed.

3.18.28 If there is sufficient time between the start of response operations and the evacuation of communities, the NSW SES Operational Area Commander will discuss the temporary closure of appropriate schools with the Regional Director, South Western Sydney Region, Department of Education. This will enable pupils to stay at home or be returned home so they can be evacuated (if required) with their families.

3.18.29 Note that in the Fairfield LGA, school principals may close some schools affected by flooding in the early stages of flooding.

3.18.30 **Assistance Animals, Pets and Companion Animals of Evacuees:** Assistance animals (guide dogs, hearing assistance animals, etc.) will remain in the care of their owners throughout the evacuation. This includes transport and access into evacuation centres etc.

Where possible owners should take their companion animals with them when they are asked to evacuate. Due to safety restrictions, it may not be possible to allow companion animals to accompany their owners when being transported via aircraft or flood rescue boat. In such circumstances Agriculture and Animal Services will coordinate separate arrangements for evacuation and care of companion animals.

3.18.31 **Transport and storage:** Transport and storage of furniture from flood threatened properties will be arranged as time and resources permit.

3.18.32 **Security:** The NSW Police Force will coordinate the provision of overall security for evacuated areas.

3.18.33 The NSW SES Incident Controller is to provide the following reports to the NSW SES Sydney Southern Region Headquarters:

a. Advice of commencement of the evacuation of each Sector,

b. Half-hourly progress reports (by Sectors) during evacuations,

c. Advice of completion of the evacuation of each Sector.
3.18.34 **Assembly areas:** An assembly area is a designated location used for the assembly of emergency-affected persons before they move to temporary accommodation or a nominated evacuation centre. As such these areas do not provide welfare assistance nor are they used for long term sheltering or provision of meals. An assembly area may also be a prearranged, strategically placed area, where support response personnel, vehicles and other equipment can be held in readiness for use during an emergency.

**Shelter**

3.18.35 **Evacuation Centres:** Evacuees will be advised to go to friends or relatives, or else be taken to the nearest accessible evacuation centre, which may initially be established at the direction of the NSW SES Incident Controller, but managed as soon as possible by Welfare Services.

3.18.36 **Registration:** The NSW Police Force will facilitate the requirement of Disaster Victim Registration for people evacuated to designated evacuation centres.

3.18.37 **Animal shelter:** Facilities to hold and care for companion animals of evacuees will be coordinated by Agriculture and Animal Services if required. If required Agriculture and Animal Services will also coordinate refuge areas for livestock (e.g. horses) where feasible.

**Return**

3.18.38 The NSW SES Incident Controller will advise when return to evacuated areas is safe after flood waters have receded and reliable access is available.

3.18.39 The NSW SES Incident Controller will determine when it is safe for evacuees to return to their homes in consultation with:

   a. The Recovery Coordinating Committee (if established)
   b. Welfare Services Functional Area Coordinator (welfare of evacuees)
   c. Engineering Services Functional Area Co-ordinator (safety of buildings, structural integrity of levees/dams)
   d. Health Service Functional Area Coordinator (public health)
   e. Transport Services Functional Areas Coordinator (arrangement of transport)
   f. The Fairfield LEOCON
   g. The Fairfield City Council
   h. NSW SES Operational Area Commander
   i. Other appropriate agencies/functional areas as required (mitigation and advice regarding identified risks resulting from the flood event).

3.18.40 Once it is considered safe to do so, the NSW SES Incident Controller will authorise the return of evacuees.

3.18.41 The return will be controlled by the NSW SES Incident Controller and may be conducted, at their request, by the Recovery Coordinator.
3.19 MANAGING RESUPPLY OPERATIONS

3.19.1 The NSW SES is responsible for the coordination of the resupply of isolated communities and properties.

3.19.2 If isolation is expected to occur, residents should be encouraged to consider their needs and suitability for an unknown period of isolation.

3.19.3 If properties/communities are going to remain in locations expected to become isolated, households/retailers should be encouraged to stock up on essential supplies.

3.19.4 Where practicable, once supplies are delivered to the NSW SES designated loading point, the NSW SES Incident Controller will arrange for the delivery of essential foodstuffs, fuels or urgent medical supplies required by an isolated property or community.

3.19.5 All reasonable efforts will be made to deliver supplies, however where necessary the NSW SES will prioritise the delivery of items.

Resupply of Isolated Towns and Villages

Strategy

3.19.6 Minimise disruption upon the community by resupplying towns and villages which have become isolated as a consequence of flooding.

Actions

3.19.7 The NSW SES is responsible for the coordination of the resupply of isolated communities.

3.19.8 If flood predictions indicate that areas are likely to become isolated, the NSW SES Incident Controller should advise retailers that they should stock up.

3.19.9 When isolation occurs, retailers will be expected to place orders with suppliers where they have a line of credit and to instruct those suppliers to package their goods and deliver them to loading points designated by the NSW SES.

3.19.10 The NSW SES is prepared to deliver mail to isolated communities but may not be able to do so according to normal Australia Post timetables.

3.19.11 The NSW SES will assist hospitals with resupply of linen and other consumables where able.

Resupply of Isolated Properties

Strategy

3.19.12 Ensure supplies are maintained to properties by coordinating the resupply of properties which have become isolated as a consequence of flooding.
Actions

3.19.13 The resupply of isolated properties is a common requirement during floods and coordination can be difficult because requests can emanate from a variety of sources. Isolated properties may call their suppliers direct, place their orders through their own social networks or contact the NSW SES.

3.19.14 The principles to be applied when planning for the resupply of isolated properties are:

a. The NSW SES will coordinate resupply and establish a schedule.

b. Some isolated households will not have the ability to purchase essential grocery items due to financial hardship. If an isolated household seeks resupply from the NSW SES and claims to be, or is considered to be, in dire circumstances, he/she is to be referred to Welfare Services for assessment of eligibility. Where financial eligibility criteria are met, Welfare Services will assist with the purchase of essential grocery items. Welfare Services will deliver the essential grocery items to the NSW SES designated loading point for transport.

c. Local suppliers will liaise with the NSW SES regarding delivery of resupply items to the designated loading point.

d. Local suppliers are responsible for packaging resupply items for delivery.

3.19.15 A flowchart illustrating the Resupply process is shown in Attachment 1. Please note that the flowchart outlines the resupply process but does not encompass all potential situations and/or outcomes.
PART 4 - RECOVERY

4.1 RECOVERY COORDINATION AT THE LOCAL LEVEL

4.1.1 The NSW SES Fairfield City Local Controller will ensure that planning for long-term recovery operations begins at the earliest opportunity, initially through briefing the Local Emergency Management Committee (LEMC). As soon as possible the LEMC will meet to discuss recovery implications including the need for a Local Recovery Committee. The LEMC will consider any impact assessment in determining the need for recovery arrangements. This is conveyed in the first instance to the State Emergency Operations Controller (SEOCON) for confirmation with the State Emergency Recovery Controller (SERCON).

4.1.2 Once the need for recovery has been identified, the SERCON, in consultation with the SEOCON, may recommend the appointment of a Local Recovery Coordinator and nominate an appropriate candidate to the Minister for Emergency Services.

4.1.3 The SERCON may send a representative to the LEMC and subsequent recovery meetings to provide expert recovery advice and guidance.

4.1.4 The NSW SES Fairfield City Local Controller and Local Emergency Operations Controller (LEOCON) attend recovery meetings to provide an overview of the emergency response operation.

4.1.5 The NSW SES Operational Area Commander, the Regional Emergency Management Officer and appropriate Regional Functional Area Coordinators will be invited to the initial local meeting and to subsequent meetings as required.

4.1.6 The recovery committee will:

a. Develop and maintain a Recovery Action Plan with an agreed exit strategy.

b. Monitor and coordinate the activities of agencies with responsibility for the delivery of services during recovery.

c. Ensure that relevant stakeholders, especially the communities affected, are involved in the development and implementation of recovery objectives and strategies and are informed of progress made.

d. Provide the SERCON with an end of recovery report.

e. Ensure the recovery is in line with the National Principles of Disaster Recovery and the NSW tenets.

4.2 RECOVERY COORDINATION AT THE REGION AND STATE LEVEL

4.2.1 In the event that an emergency affects several local areas, a Region Emergency Management Committee (REMC) will meet to discuss recovery
implications including the need for a Region Recovery Committee. This is conveyed in the first instance to the SEOCON for confirmation with the SERCON.

4.2.2 In the event of an emergency which affects multiple regions, or is of state or national consequence, or where complex, long term recovery and reconstruction is required, it may be necessary to establish a State Recovery Committee and the appointment of a State Recovery Coordinator.

4.3 ARRANGEMENTS FOR DEBRIEFS / AFTER ACTION REVIEWS

4.3.1 As soon as possible after flooding has abated, the NSW SES Fairfield City Local Controller will advise participating organisations of details of response operation after action review arrangements.

4.3.2 The NSW SES Fairfield City Local Controller will ensure that adequate arrangements are in place to record details of the after action review and each item requiring further action is delegated to an organisation or individual to implement.

4.3.3 Follow-up to ensure the satisfactory completion of these actions will be undertaken by the Fairfield Local Emergency Management Committee.
ATTACHMENT 1 - RESUPPLY FLOWCHART

Please Note: The chart outlines the resupply process, but does not encompass all potential situations and outcomes.
ATTACHMENT 2 - DAM FAILURE ALERT NOTIFICATION ARRANGEMENTS FLOWCHART

Notification Arrangements for Potential Dam Failure

DAM OWNER/OPERATOR
ISSUES WHITE/ AMBER / RED ALERT

PRIMARY CONTACT

ALTENATE CONTACT (To be used ONLY if SES cannot be contacted)

NSW SES State Operations Communications Centre (OCC)
Ph: (see note 4 below)

Confirms message received and that appropriate support is being arranged

Duty Officer, State Emergency Operations Centre (SEOC)
Ph: (see note 4 below)

Confirms message received and that appropriate support is being arranged

Regional Emergency Management Officers (REMOs)
Confirms LEOCON is aware of dam failure warning and that SES is Combat Agency

NSW SES Region HQ Operations Controller / After Hours Duty Officer

Confirms message received and that appropriate support is being arranged

NSW SES Local Controllers / After Hours Duty Officer

Confirms message received and that appropriate support is being arranged

Local Emergency Operations Controller(s) (LEOCONs)

Response Controlled through Local Flood Plans with reference to DSEP for potential inundation area

Activation of the Local Flood Plan includes notification to the LEOCON and activation of supporting arrangements within the Local EMPLAN

NOTES:
1. Dam owners should only contact the SEOC if the SES State Operations Communications Centre (OCC) cannot be contacted.
2. The first priority for notification is to contact the next SES HQ or the next level of EOC down the flowchart. The second notification should always be across the flowchart to confirm the message is received. If the first priority notification fails or is not picked up for any reason, the second priority notification should be made before any further attempts to contact the first priority (this is why an alternate or backup system of contacts is in place).
3. The triple zero (000) number for emergency services should not be used unless contact cannot be made with SES or the SEOC, as it is likely the triple zero (000) operators will have difficulty dealing with the very unusual case of potential or actual dam failure.
4. Dam owners must contact the SES State Headquarters during the preparation of the DSEP to obtain the appropriate emergency contact numbers.

HAZARD AND RISK IN FAIRFIELD CITY

Volume 2 of the Fairfield City Local Flood Plan

Last Update: March 2005
ANNEX A - THE FLOOD THREAT

General

1. All most all of the Fairfield City council area is situated within the Georges River catchment. The council area includes a reach of the Georges River and its tributary systems of Prospect, Orphan School and Cabramatta Creeks. The western section of the council area is drained by Ropes Creek, Kemps Creek and South Creek which flow in a generally northerly direction to the Hawkesbury Nepean River outside the council area. Some reaches of Prospect Creek, Cabramatta Creek and the Georges River constitute the boundaries of the local government area. The catchment is heavily urbanised, with flash flooding likely to occur in small creeks.

2. Low lying areas away from creeks and rivers can also experience flooding during and after heavy rains which are sometimes associated with slow moving, severe thunderstorms. Such storms usually occur during summer months. They are of short duration and the flooding occurs soon after the heavy rain. No part of the council area can be considered free from short-term, localised shallow flooding from thunderstorm rains which cause drains to overflow, minor creeks to burst their banks briefly and ponding to occur in low-lying areas.

3. A large water storage, Prospect Reservoir, has been constructed across the upper reaches of Prospect Creek, just outside the council boundaries. This dam was once deficient and considered to be at slight risk of failure, but remedial works undertaken by the dam owner have rendered it effectively safe from failure.

Weather Systems and Flooding

4. Flooding in the council area can be caused by a variety of weather systems. The following describes these systems:

   a. Flooding can result from low-pressure systems situated off the NSW coast. These systems can occur at any time of year and typically travel along the coast. These systems can cause flooding in the Georges River and tributary creek systems.

   b. During the summer months, high intensity, short-duration severe thunderstorms can also bring very heavy rainfall over periods of a few minutes to an hour or two. Flash flooding may result from individual thunderstorms when they are slow-moving, or from banks of them occurring over a few hours. Such storms cause localised overland flooding and overflow stormwater drains and can cause rapid rises on the creeks. They do not cause main-river flooding on the Georges River, however.

5. Rainfall totals of more than 200mm in 48 hours have been recorded at several locations within the catchment of the Georges River, and falls of over 500mm in 96 hours have been recorded in the upland southern areas immediately west of the
Illawarra escarpment. Much more intense falls over shorter periods than this have been recorded, and are worth noting that falls of over 800mm in less than 24 hours occurred on the Illawarra escarpment only 25 kilometres south of the southern-most portion of the Georges River catchment in the February 1984 flood.

**Flood History**

6. Of the 20 floods known to have reached or exceed the current minor flood level of 2.0 metres at the Liverpool Weir, 9 occurred in the February to April period and 7 between May and August. The peak seasons for floods is therefore late summer to late winter, with little flooding in spring and early summer months. The timing of episodes of major floods shows a similar pattern.

8. A flood of a particular AEP (Annual Exceedance Probability) has that percentage chance each year of being reached or exceeded at the specified gauge location. Thus there is a 5% chance in every year that a flood of at least 4 metres will be experienced at the Sackville Bridge Gauge. This equates to one such flood being experienced, on average, every 20 years (that is, the Average Recurrence Interval or ARI of such a flood is 20 years). In a particular 20 year, such a flood could occur more than once or not at all. The lower the AEP, the higher and more severe the flood and the longer the ARI: thus the 1% AEP flood at the Sackville Bridge gauge would reach 4.3 metres, 0.3 metres higher than the 5% AEP flood. The ‘extreme flood’ would be very rare indeed: the values given are estimates for the worst flood possible on Prospect Creek. Such a flood might be expected to occur only once every 10,000-1,000,000 years.

9. The March 1983 flood reached much lower levels than did the 1961 flood and probably approximated the 10-30% AEP event. That is, a flood reaching the heights of the 1983 flood can be expected, on average, every 3-10 years. In this event there was little overbank flooding and therefore only limited property inundation beyond the riverside parks.

10. The 1% AEP flood would be expected to reach about 0.5 metres higher than the 5% AEP flood at these gauges and floodwaters would penetrate further away from the river. In the ‘extreme flood’, river levels would be about an additional 3 metres higher than in the 1% AEP event and about 3.5 metres higher than in November 1961. Obviously the extreme flood would spread much further and inundate much larger areas (and to a greater depth). Substantial areas not normally considered to be flood prone would be inundated.

11. Flooding much more severe than has been seen by present residents of the Fairfield City Council area is inevitable, but such flooding occurs very rarely.
ANNEX B - EFFECTS OF FLOODING ON THE COMMUNITY

Community Profile

1. According to the 2001 census the total population of the Fairfield City council area is approximately 181,936 people. The following table provides a brief overview of the demographic characteristics of the Fairfield City council area.

<table>
<thead>
<tr>
<th>Census Description</th>
<th>Result (2001 Census)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total persons</td>
<td>181,936</td>
</tr>
<tr>
<td>Total persons aged 65 years and over</td>
<td>17,969</td>
</tr>
<tr>
<td>Total persons aged below 15 years</td>
<td>41,141</td>
</tr>
<tr>
<td>Percentage of single parent families</td>
<td>18 percent</td>
</tr>
<tr>
<td>Persons living alone</td>
<td>4,544</td>
</tr>
<tr>
<td>Total persons who do not speak English well</td>
<td>109</td>

<tr>
<td>Households without vehicles</td>
<td>5,047</td>
</tr>
<tr>
<td>Total persons born overseas</td>
<td>95,343</td>
</tr>
<tr>
<td>Percentage of persons who do not speak English or not very well</td>
<td>32 percent</td>
</tr>
<tr>
<td>Total persons who speak English only at home</td>
<td>52,672</td>
</tr>
<tr>
<td>Total persons who speak other languages other than English at home</td>
<td>119,738</td>
</tr>
</tbody>
</table>

Table 1 Community Profile based upon 2001 census data

2. Large percentages of Fairfield City’s population were born overseas and speak a language other than English. Thirty two percent of the population do not speak English or do not speak it well. There is a large diversity of different languages spoken in the council area including Arabic, Chinese, Croatian, Greek, Hindi, Italian, Khmer, Macedonian, Maltese, Polish, Serbian, Spanish, Tagalog (Filipino), Turkish and Vietnamese. It is important to account for this diversity of language when disseminating public information.

3. It is significant that 10 percent of the population is aged above 65 years. Elderly people are often frail and unable to respond quickly without assistance. Some of them may also be socially isolated, resulting in them being unaware of evacuation warnings.
or unable to decide on a course of action. Areas with particularly high proportions of elderly residents should be targeted for doorknocking and the provision of transport.

4. There are a large number of single-parent families in Fairfield City. Single-parent families are often characterised by low adult-children ratios, which makes evacuation more difficult. Areas with particularly high proportions of single parent families should be targeted in doorknocking and for the provision of transport.

Areas at Risk

5. Most floods on the Georges River, Prospect, Orphan School and Cabramatta Creeks within the Fairfield City Council area inundate only small areas of parkland and recreational land adjacent to these watercourses and produce nuisance flooding on roads. About every 1-5 years on average, however, residential and commercial land is affected and the impact becomes more serious in the larger and more rarely occurring floods. The paragraphs below summarise the scale of the problem in the various areas, which are at risk.

6. Some streets close to the Georges River, Prospect, Orphan School and Cabramatta Creeks experience inundation during floods, and residential, commercial and industrial properties are affected to varying degrees in floods of differing severity. About 40 houses could experience over-floor inundation in a 1% AEP event, with water up to metre deep in the houses in the worst cases. A further 20 houses could experience over-ground inundation in such an event, which could also flood about 10 industrial and a small number of other premises. The areas of impact are widely scattered within the city.

7. In an extreme flood, about 250 houses could be inundated above floor level. The worst affected areas would be Lansvale and Carramar, with numerous home units as well as separate houses being affected. In such an event the floodwaters would be much deeper and faster flowing in the areas noted above than in a 1% AEP event.

8. Properties at risk are located in the following streets:

   a. Vine Street Lansvale
   b. May Street Lansvale
   c. Togil Street Lansvale
   d. Vincent Crescent Canley Vale
   e. Noble Street Canley Vale
   f. Ramsay Street Canley Vale
   g. Cook Avenue Canley Vale
   h. Waterside Crescent Lansvale
   i. Day Street Lansvale
j. Knight Street Lansvale
k. Willis Street Lansvale
l. Hollywood Drive Lansvale
m. Freeman Avenue Canley Vale

9. In addition to the streets above the following roads may suffer flooding resulting in their closure:
   a. The Horsley Drive Smithfield (no homes)
   b. Railway Parade Fairfield (no homes)
   c. Hume Highway Lansvale (no homes)

10. The following special risks located within the council area are prone to flooding:
    a. Patrician Brothers Fairfield
    b. Fairfield High School
    c. Lansvale East Public School
    d. Canley Vale Nursing Home
    e. Fairfield Nursing Home
    f. Lansdowne Caravan Park (See Annex D for details)
SES RESPONSE
ARRANGEMENTS FOR
FAIRFIELD CITY

Volume 3 of the Fairfield City Local Flood Plan

Last Update: March 2005
ANNEX C - EVACUATION WARNING MESSAGE

Date/Time of Issue:

Authorised By:

It is recommended that you prepare to evacuate/for evacuation within the next [TO BE COMPLETED AT TIME OF FLOOD] hours. If you leave it until later, the roads may be congested or closed.

To prepare for evacuation, you should:

• Raise belongings by placing them on tables, beds and benches. Put electrical items on top. Some items may be able to be placed in ceilings.
• Gather medicines, personal and financial documents and mementos together to take with you.
• Listen to radio stations 2UE and 2NBC for further information and to confirm this warning.
• If possible, check to see whether your neighbours need help.
• If possible, make arrangements for care of pets or companion animals.

If evacuation is necessary:

• Turn off the electricity, gas and water.
• Take three days’ supply of clothes with you.
• If you have a car, drive to the evacuation centre at [to be completed at time of flood]
• [to be completed at time of flood] (Specify route if appropriate).
• If you don’t have a car, buses will operate on normal routes. Special transport can also be provided on request if necessary, telephone 97272228 (SES).
• So that you can be accounted for, it is important that you register at the evacuation centre.
• After registering, you may go to the house of a friend or relative. Alternatively, accommodation will be arranged for you.
• The Police will provide security for your property while you are away.
ANNEX D - LANSDOWNE PARK FLOOD ACTION PLAN

General

1. The following is a summary of the Flood Action Plan developed by the owners of Lansdowne Park.

Flood Action Plan

2. Lansdowne Park is situated at 61 Hume Highway, Lansvale, NSW 2166. It is a permanent residence park which consists of 273 self-contained mobile homes, all of which cannot be moved.

3. There are approximately 49 units along the Prospect Creek bank which may be at risk. There are approximately 700 residents at Lansdowne Park.

4. The Lansdowne Park Caretaker/Security is responsible for the operation of this plan.

5. There is one entrance/exit to the park as well as an emergency exit.

6. All electrical to units can be isolated by a main switch located at the front of the park.

7. Wardens have been appointed to assist in the event of an evacuation.

8. Residents will be informed via regular newsletter, details of the flood action plan.

9. An emergency /evacuation signal to be decided upon and installed.

10. Park management will keep Fairfield SES informed in case of flooding and ask for assistance if needed.

11. Park management will inform residents when they can return to their units.

12. All tenants to be notified that in event of a flood they will be told by Park Management appointed wardens that they need to prepare for a flood by doing the following:

   a. If they are expecting to be absent from their unit for an extended period, provide Park Management with a key to their unit in a sealed envelope.

   b. Provide a contact number and address.

   c. Ensure that they have spare batteries for their radios.

   d. Listen to a local radio station for updated flood information.

   e. Prepare for evacuation. Place contents of their units as high as possible within their unit.
f. Collect all personal papers, medicines, toiletries, bed clothes and change of clothes.

g. Move to the designated location. (Park Community Room)

h. Tenants will be notified by Park Management when they can return to their units.

**Action to be taken in the event of a flood**

13. When water level in the Prospect Creek reaches a dangerous level, Park Management to phone Fairfield SES and inform them of the water level. Contact to be made every hour and report water level.

14. Wardens to be advised to instruct all residents of the danger of flooding.

15. If the water reaches flood level and begins entering the park, contact Fairfield SES and advise that our Flood Action Plan is being implemented.

16. Contact all tenants and advise that the park is being evacuated.

17. All power units to be isolated by the main switch room at the front of the park.

18. If the water level continues to rise and it is unsafe for any person to stay on the park, Fairfield SES will be contacted and requested to organise transport.

19. Contact all tenants and advise that the park is being evacuated.

20. Open all access gates.

21. Tenant listing to be used to ensure everybody has left the park.

22. After everyone has left the park, boom gates are to be lowered an emergency exit gates are to be locked for security. Wardens are to patrol the park until such time as it becomes unsafe to do so. If water levels become too high for wardens to patrol, they will move to the manager’s residence above the office building to observe the park.
