June 2013

To be reviewed no later than June 2018

LAKE MACQUARIE CITY
FLOOD EMERGENCY
SUB PLAN

A Sub-Plan of the Lake Macquarie City Local Emergency Management Plan (EMPLAN)

Volume 1 of the Lake Macquarie City Local Flood Plan
AUTHORISATION

The Lake Macquarie City Flood Emergency Sub Plan is a sub plan of the Lake Macquarie City Local Emergency Management Plan (EMPLAN). It has been prepared in accordance with the provisions of the State Emergency Service Act 1989 (NSW) and is authorised by the Local Emergency Management Committee in accordance with the provisions of the State Emergency and Rescue Management Act 1989 (NSW).

GLOSSARY

**Annual Exceedance Probability (AEP).** The chance of a flood of a given or larger size occurring in any one year, usually expressed as a percentage. For example, if a peak flood level (height) has an AEP of 5%, there is a 5% chance (that is, a one-in-20 chance) of such a level or higher occurring in any one year (see also Average Recurrence Interval).

**Assistance Animal.** A guide dog, a hearing assistance dog or any other animal trained to assist a person to alleviate the effect of a disability (Refer to Section 9 of the Disability Discrimination Act 1992).

**Australian Height Datum (AHD).** A common national surface level datum approximately corresponding to mean sea level.

**Average Recurrence Interval (ARI).** The long-term average number of years between the occurrence of a flood as big as, or larger than, the selected event. For example, floods reaching a height as great as, or greater than, the 20 year ARI flood event will occur on average once every 20 years.

**Catchment (river basin).** The land area draining through the main stream, as well as tributary streams, to a particular site. It always relates to an area above a specific location.

**Coastal Erosion.** The loss of land along the shoreline predominantly by the offshore movement of sand during storms.

**Dam Break Study.** A Dambreak Study is undertaken to determine the likely downstream inundation areas in case of a dam failure. Modelling is undertaken for a range of dam breach possibilities and design floods. The dambreak study includes information such as the extent of flooding, flood travel times and flood water velocities. The study can assist dam owners, regulators, and emergency agencies in the preparations of evacuation plans, dam break and other flood warning systems, and hazard classification of affected areas.

**Dam Failure.** The uncontrolled release of a water storage. The failure may consist of the collapse of the dam or some part of it, or excessive seepage or discharges. The most likely causes of dam failure are:

- **Flood Induced Dam Failure:** Dam failure caused by flood, either due to overtopping erosion or by subsequent structural failure.
- **Sunny Day Dam Failure:** Dam Failure as a result of factors other than flood ie other than flood flow into the reservoir. Causes of "Sunny Day" dam failure can include internal erosion, landslide, piping, earthquake or sabotage.
**Dam Safety Emergency Plan (DSEP).** A DSEP outlines the required actions of owners and their personnel at dams in response to a range of possible emergency situations. The NSW Dam Safety Committee requires a quality controlled DSEP, with associated dambreak warning procedures to be prepared for prescribed dams where persons may be at risk downstream, if the dam failed.

**Design flood (or flood standard).** A flood of specified magnitude that is adopted for planning purposes. Selections should be based on an understanding of flood behaviour and the associated flood risk, and take account of social, economic and environmental considerations. There may be several design floods for an individual area.

**Emergency Alert.** The national telephone warning system used by emergency services to send voice messages to landlines and text messages to mobile phones within a defined area, about likely or actual emergencies.

**EMPLAN (Emergency Management Plan).** The object of a EMPLAN is to ensure the coordinated response by all agencies having responsibilities and functions in emergencies.

**Essential services.** Those services, often provided by local government authorities, that are considered essential to the life of organised communities. Such services include power, lighting, water, gas, sewerage and waste management.

**Evacuation.** The temporary movement of people from a dangerous or potentially dangerous place to a safe location, and their eventual return. It is a safety strategy which uses distance to separate people from the danger created by the hazard.

**Evacuation Order.** Notification to the community, authorised by the NSW SES, when the intent of an Incident Controller is to instruct a community to immediately evacuate in response to an imminent threat.

**Evacuation Warning.** Notification to the community, authorised by the NSW SES, when the intent of an Incident Controller is to warn a community of the need to prepare for a possible evacuation.

**Flash flooding.** Flooding which is sudden and often unexpected because it is caused by sudden local or nearby heavy rainfall. It is sometimes defined as flooding which occurs within six hours of the rain that causes it.

**Flood.** Relatively high water level which overtops the natural or artificial banks in any part of a stream, river, estuary, lake or dam, and/or local overland flooding associated with drainage before entering a watercourse, and/or coastal inundation resulting from super-elevated sea levels and/or waves overtopping coastline defences, including Tsunami.
Flood classifications. Locally defined flood levels used in flood warnings to give an indication of the severity of flooding (minor, moderate or major) expected. These levels are used by the State Emergency Service and the Australian Government Bureau of Meteorology in flood bulletins and flood warnings.

Flood intelligence. The product of collecting, collating, analysing and interpreting flood-related data to produce meaningful information (intelligence) to allow for the timely preparation, planning and warning for and response to a flood.

Flood fringe. The remaining area of flood prone land after floodway and flood storage have been defined.

Flood liable land (also referred to as flood prone land). Land susceptible to flooding by the Probable Maximum Flood (PMF) event. This term also describes the maximum extent of a floodplain which is an area of a river valley, adjacent to the river channel, which is subject to inundation in floods up to this event.

Flood of record. Maximum observed historical flood.

Floodplain Management Plan. A plan developed in accordance with the principles and guidelines in the New South Wales Floodplain Development Manual. Such a plan usually includes both written and diagrammatic information describing how particular areas of flood prone land can be used and managed to achieve defined objectives.

Flood Plan. A response strategy plan that deals specifically with flooding and is a sub-plan of a Emergency Management Plan. Flood plans describe agreed roles, responsibilities, functions, strategies and management arrangements for the conduct of flood operations and for preparing for them. A flood plan contains information and arrangements for all floods whereas an IAP is for a specific flood/event.

Flood Rescue. The rescue or retrieval of persons trapped by floodwaters.

Flood storage areas. Those parts of the floodplain that are important for the temporary storage of floodwaters during the passage of a flood. The extent and behaviour of flood storage areas may change with flood severity, and loss of flood storage can increase the severity of flood impacts by reducing natural flood attenuation.

Floodway. An area where a significant volume of water flows during floods. Such areas are often aligned with obvious naturally-defined channels and are areas that, if partially blocked, would cause a significant redistribution of flood flow which may in turn adversely affect other areas. They are often, but not necessarily, the areas of deeper flow or the areas where higher velocities occur.
Flood Watch. A Flood Watch is a notification of the potential for a flood to occur as a result of a developing weather situation and consists of short generalised statements about the developing weather including forecast rainfall totals, description of catchment conditions and indicates streams at risk. The Bureau will also attempt to estimate the magnitude of likely flooding in terms of the adopted flood classifications. Flood Watches are normally issued 24 to 36 hours in advance of likely flooding. Flood watches are issued on a catchment wide basis.

Flood Warning. A Flood Warning is a gauge specific forecast of actual or imminent flooding. Flood Warnings specify the river valley, the locations expected to be flooded, the likely severity of flooding and when it will occur.

Functional Area. A category of services involved in the preparations for an emergency, including the following:

- Agriculture and Animal Services;
- Energy and Utility Services;
- Engineering Services;
- Environmental Services;
- Health Services;
- Public Information Services;
- Telecommunication Services;
- Transport Services; and
- Welfare Services.

Geographic Information System (GIS). A geographic information system (GIS) integrates hardware, software, and data for capturing, managing, analysing, and displaying all forms of geographically referenced information.

Incident Action Plan (IAP). An action plan for managing a specific event. Information from the Local Flood Plan is used to develop the flood IAP.

Indirect Effect. Indirect effects are generally a consequence of infrastructure damage or interruption of services and can affect communities distant from the actual flood footprint i.e. floodplain. Indirect effects can also refer to indirect losses due to disruption of economic activity, both in areas which are inundated or isolated. Indirect effects are one of the three primary sources of risk in the context of flooding (the other two are inundation and isolation).

Inundation. See definition for Flood.
Isolation. Properties and/or communities where flooding cuts access to essential services or means of supply. Isolation is one of the three primary sources of risk in the context of flooding (the other two are inundation and indirect effects).

Local overland flooding. Inundation by local runoff rather than overbank discharge from a stream, river, estuary, lake or dam.

Major flooding. Flooding which causes inundation of extensive rural areas, with properties, villages and towns isolated and/or appreciable urban areas flooded.

Minor flooding. Flooding which causes inconvenience such as closing of minor roads and the submergence of low-level bridges. The lower limit of this class of flooding, on the reference gauge, is the initial flood level at which landholders and/or townspeople begin to be affected in a significant manner that necessitates the issuing of a public flood warning by the Australian Government Bureau of Meteorology.

Moderate flooding. Flooding which inundates low-lying areas, requiring removal of stock and/or evacuation of some houses. Main traffic routes may be covered.

Peak height. The highest level reached, at a nominated gauging station, during a particular flood event.

Prescribed Dam. "Prescribed" dams are those listed in Schedule 1 of the Dams Safety Act 1978. The NSW Dam Safety Committee will prescribe those dams with the potential for a failure which could have a significant adverse effect on community interests.

Probable Maximum Flood (PMF). The largest flood that could conceivably be expected to occur at a particular location, usually estimated from probable maximum precipitation. The PMF defines the maximum extent of flood prone land, that is, the floodplain. It is difficult to define a meaningful Average Recurrence Interval for the PMF, but it is commonly assumed to be of the order of $10^4$ to $10^7$ (once in 10,000 to 10,000,000 years).

Runoff. The amount of rainfall which ends up as stream flow, also known as ‘rainfall excess’ since it is the amount remaining after accounting for other processes such as evaporation and infiltration.

Stage height. A level reached, at a nominated gauging station, during the development of a particular flood event.

Stream gauging station. A place on a river or stream at which the stage height is routinely measured, either daily or continuously, and where the discharge is measured from time to time so as to develop a relationship between stage and discharge or rating curve.
PART 1 - INTRODUCTION

1.1 PURPOSE

1.1.1 This plan covers preparedness measures, the conduct of response operations and the coordination of immediate recovery measures from flooding within the Lake Macquarie City Council area. It covers operations for all levels of flooding within the council area.

1.1.2 The plan also covers arrangements for the management of coastal erosion in the council area.

1.2 AUTHORITY

1.2.1 This plan is issued under the authority of the State Emergency and Rescue Management Act 1989 and the State Emergency Service Act 1989. It has been approved by the NSW SES Lake Macquarie City Local Controller and the NSW SES Hunter Region Controller as a NSW SES plan and endorsed by the Lake Macquarie Local Emergency Management Committee as a sub plan of the Local EMPLAN.

1.3 AREA COVERED BY THE PLAN

1.3.1 The area covered by the plan is the Lake Macquarie City Council area which includes: substantial urban and suburban areas and large areas of rural and conservation lands.

1.3.2 The council area includes, but is not limited to, the following major catchment areas:

a. Dora Creek (Dora Creek, Cooranbong); Stony Creek (Blackalls, Toronto); Cockle Creek (Barnsley, Edgeworth, Boolaroo); Winding Creek (Cardiff and Glendale); North Creek (Warners Bay); South Creek (Warners Bay), Marmong Creek (Marmong Point), LT Creek (Fassifern), Stockyard Creek (Morisset); Pourmalong Creek (Wyee), Jewells Wetland incorporating Scrubby, Johnsons and Crokers Creeks (Mt Hutton, Windale, Gateshead, Jewells and Redhead) and Sheppards Creek (Valentine) and their tributaries and numerous other creeks, some of them unnamed.

b. Lake Macquarie Waterway (The Lake).

c. The coastline from just below Glenrock Lagoon in the north to Catherine Hill Bay in the south.

1.3.3 The council area and its principal rivers and creeks are shown in Attachment 3.

1.3.4 The council area is in the NSW SES Hunter Region and for emergency management purposes is part of the Hunter Central Coast Emergency Management Region.
1.4 DESCRIPTION OF FLOODING AND ITS EFFECTS

1.4.1 The NSW SES maintains information on the nature of flooding and effects of flooding on the community in the Lake Macquarie City area.

1.5 RESPONSIBILITIES

1.5.1 The general responsibilities of emergency service organisations and supporting services (functional areas) are listed in the Local and State Emergency Management Plans (EMPLAN). Some specific responsibilities are expanded upon in the following paragraphs. The extent of their implementation will depend on the severity of the flooding. Specific responsibilities of agencies and organisations as they relate to tsunami are detailed in the State Tsunami Emergency Sub Plan.

1.5.2 NSW SES Lake Macquarie City Local Controller. The NSW SES Lake Macquarie City Local Controller is responsible for dealing with floods as detailed in the State Flood Plan, and will:

**Preparedness**

a. Maintain a Local Headquarters at the corner of Creek Reserve Road and Fourth Street, Boolaroo in accordance with the NSW SES Controllers’ Guide and the NSW SES Operations Manual.

b. Ensure that NSW SES members are trained to undertake operations in accordance with current policy as laid down in the NSW SES Controllers’ Guide and the NSW SES Operations Manual.

c. Coordinate the development and operation of a flood warning service for the community.

d. Participate in floodplain and coastal risk management initiatives organised by the Lake Macquarie City Council.

e. Coordinate a public education program.

f. Identify and monitor people and/or communities at risk of flooding and coastal erosion.

g. Ensure that the currency of this plan is maintained.

**Response**

h. Appoint an appropriate Local Incident Controller to undertake response roles. The Incident Controller will:

i. Control flood and storm response operations. This includes:
   - Directing the activities of the NSW SES units operating within the council area.
   - Coordinating the activities of supporting agencies and organisations and ensuring that liaison is established with them.
• Contribute to preparation of Region IAP.

j. Provide an information service in relation to:
• Flood heights and flood behaviour.
• Coastal erosion / inundation.
• Road conditions and closures.
• Advice on methods of limiting property damage.
• Confirmation of evacuation warnings and evacuation orders.

k. Direct the conduct of flood rescue operations.

l. Direct the evacuation of people and/or communities.

m. Provide immediate welfare support for evacuated people.

n. Coordinate the provision of emergency food and medical supplies to isolated people and/or communities.

o. Coordinate operations to protect property, for example by:
• Arranging resources for sandbagging operations.
• Lifting or moving household furniture.
• Lifting or moving commercial stock and equipment.

p. Arrange for support (for example, accommodation and meals) for emergency service organisation members and volunteers assisting them.

q. Ensure that the managers of caravan parks and holiday parks are advised of flood warnings and the details of any evacuation order.

r. If NSW SES resources are available, assist with emergency fodder supply operations conducted by Agriculture and Animal Services.

s. If NSW SES resources are available, assist the NSW Police Force, RMS and Council with road closure and traffic control operations.

t. Exercise financial delegations relating to the use of emergency orders as laid down in the NSW SES Controllers’ Guide.

u. Coordinate the collection of flood and coastal erosion/inundation information for development of intelligence.

v. Submit Situation Reports to the NSW SES Hunter Region Headquarters and agencies assisting within the council area. These will contain information on:
• Road conditions and closures.
• Current flood behaviour.
• Current operational activities.
• Likely future flood behaviour.
• Likely future operational activities.
• Probable resource needs.

w. Keep the Local Emergency Operations Controller advised of the flood situation and the operational response.

x. Issue the ‘All Clear’ when flood operations have been completed.

Recovery

y. Ensure that appropriate After Action Reviews are held after floods.

z. Provide appropriate representation to the recovery committee for the duration of the response phase of an event and as agreed during the recovery phase.

1.5.3 NSW SES Cooranbong Unit Controller:

a. Maintain a Unit Headquarters at the corner of Martinsville Road and Freemans Drive, Cooranbong in accordance with the NSW SES Controllers’ Guide and the NSW SES Operations Manual.

b. Assist the NSW SES Lake Macquarie City Local Controller with flood preparedness activities, including:

• Flood planning.

• Training of unit members.

• The development of flood and coastal erosion/inundation intelligence.

• The development of warning services.

• Floodplain and coastal risk management initiatives.

• Community engagement and education.

c. Conduct flood and coastal erosion operations within the Lake Macquarie area as directed by the NSW SES Lake Macquarie City Local Incident Controller.

d. Submit Situation Reports to the NSW SES Lake Macquarie City Local Headquarters, the NSW SES Hunter Region Headquarters and agencies assisting within the local area.

1.5.4 NSW SES Lake Macquarie and Cooranbong Unit Members - within their respective operational areas (Cooranbong Unit: covering areas between Fennell Bay and Wyee, including Dora Creek; Lake Macquarie City Unit: covering the remainder of the council area):

a. Carry out flood and coastal erosion response tasks. These may include:

• The management of the NSW SES Lake Macquarie City Local and Cooranbong Unit Headquarters Operations Centres.

• Assist in the collection of flood and coastal erosion/inundation information for the development of intelligence.

• Flood rescue.

• Evacuation.
- Providing immediate welfare for evacuated people.
- Delivery of warnings and information.
- Resupply.
- Sandbagging.
- Lifting and/or moving household furniture and commercial stock.
- Animal rescue.
- Assisting with road closure and traffic control operations.
- Assisting with emergency fodder supply operations.

b. Assist with preparedness activities.

c. Undertake training in flood and storm response operations

1.5.5 **Agriculture and Animal Services Functional Area:**

a. When requested by NSW SES;

   - Activate the Agriculture and Animal Services Supporting Plan as required and coordinate the provision of required services which may include:
     - Supply and delivery of emergency fodder.
     - Coordinate the management of livestock and farm animals.
     - Advice on dealing with dead and injured farm animals.
     - Financial, welfare and damage assessment assistance to flood affected farmers.
     - Operation of animal shelter compound facilities for the domestic pets and companion animals of evacuees.

1.5.6 **The Ambulance Service of NSW – Belmont, Boolaroo, Cardiff, Charlestown, Morisset and Toronto:**

a. Assist with the evacuation of at risk communities (in particular elderly and/or infirm people).

b. Deploy ambulance resources to appropriate locations if access is expected to be lost.

c. Assist the NSW SES with flood rescue operations.

1.5.7 **Australian Government Bureau of Meteorology (The Bureau):**

a. Provide Flood Watches for Lake Macquarie.

b. Provide Flood Warnings, incorporating height-time predictions, for Lake Macquarie on the Belmont gauge.

c. Provide severe weather warnings when large waves and/or storm surge conditions are forecast to result in coastal erosion/inundation.

d. Provide severe weather warnings when flash flooding is likely to occur.
1.5.8 **Caravan and Holiday Park Managers** – Belmont Bayview Park, Belmont Pines Lakeside Holiday Park, Blacksmiths Beachside Holiday Park, Lake Macquarie Village, Ocean Breeze Caravan Park, Paradise Palms, Swansea Gardens Lakeside Holiday Park, Spinnakers Leisure Park, Sunstrip Park, Teralba Lakeside Caravan Park, The Sanctuary and Wangi Point Lakeside Holiday Park:

b. Install flood depth indicators and road alignment markers within their caravan parks.

c. Ensure that owners and occupiers of caravans are aware that the caravan park is flood liable by:
   - Handing a printed notice to occupiers taking up residence. The notice will indicate that the caravan park is liable to flooding and outline the evacuation and van relocation arrangements.
   - Displaying this notice prominently in each van.

d. Ensure that owners and occupiers of caravans are aware that if they are expecting to be absent from their vans for extended periods, they must:
   - Provide the manager with a key; in a sealed envelope; to the van.
   - Provide a contact address and telephone number.
   - Inform the manager if a vehicle will be required to relocate the van during flood time.
   - Leave any mobile van in a condition allowing it to be towed in an emergency (i.e: tyres inflated, jacks wound up, personal effects secured and annexes and lines for water, sewer, electricity and gas readily detachable).

e. Ensure that occupiers are informed of Flood Watches and Flood Warnings. At this time, occupiers should be advised to:
   - Ensure that they have spare batteries for their radios.
   - Listen to a local radio station for updated flood information.
   - Prepare for evacuation and van relocation.

f. Ensure that owners and occupiers of caravans are aware of what they must do to facilitate evacuation and van relocation when flooding occurs Owners of vans which are incapable of being relocated should ensure they are securely anchored to their site to avoid being swept away.

g. Coordinate the evacuation of people and the relocation of moveable vans when floods are rising and their return when flood waters have subsided. Vans will be towed back to the caravan park(s) by van owners or by vehicles and drivers arranged by the park managers.

h. Inform the NSW SES of the progress of evacuation and/or van relocation operations and of any need for assistance in the conduct of these tasks.
1.5.9 **Child Care Centres and Preschools:**

a. Childcare Centres and preschools are to be contacted by the NSW SES in the event of possible flooding or isolation.

b. When notified the child care centres and preschools should:
   - Liaise with the NSW SES and arrange for the early release of children whose travel arrangements are likely to be disrupted by flooding and/or road closures.
   - Assist with coordinating the evacuation of preschools and child care centres

1.5.10 **Citizens’ Radio Emergency Service Teams (CREST) / Wireless Institute Civil Emergency Network (WICEN):**

a. Provide communications assistance.

1.5.11 **Dora Creek District Progress Association and Climate Ready Dora Creek Sustainable Neighbourhood Group:**

a. Disseminate information on rising floods within the township of Dora Creek in consultation with the Cooranbong Unit Controller.

1.5.12 **Energy and Utility Services Functional Area:**

a. When requested by NSW SES:
   - Implement the Energy and Utilities Services Functional Area Supporting Plan.
   - Where required, coordinate energy and utility services emergency management planning, preparation, response and recovery, including the restoration of services following a flood event.
   - Coordinate advice to the NSW SES of any need to disconnect electricity, gas, water or wastewater services.
   - Assist the NSW SES to identify infrastructure at risk of flooding for incorporation into planning and intelligence.
   - Identify interdependencies between flooding and utility services due to secondary impacts of flooding and advise the NSW SES.
   - Assist the NSW SES with advisory notices relating to hazards from utility services during flooding.
   - Coordinate with utilities on restoration of services, including advisory notices relating to estimated time for restoration and mandatory safety checks prior to reconnection. Advise the NSW SES and the relevant recovery committee and coordinator of the timetable for restoration.

b. Local electricity, gas, water, waste water infrastructure networks operator/distributors- Ausgrid, Jemena and Hunter Water Corporation, Lake Macquarie City Council:
- Provide advice to the NSW SES Lake Macquarie City Local Incident Controller of any need to disconnect power/gas/water/waste water supplies or of any timetable for reconnection.
- Advise the NSW SES of any hazards from utility services during flooding and coastal erosion/inundation.
- Advise the public with regard to respective hazards during flooding and coastal erosion/inundation, and to the availability or otherwise of the electrical/gas/water and wastewater facilities.
- Clear or make safe any hazard caused by power lines or electrical reticulation equipment.
- Inspect, test and reconnect customers’ electrical/ gas/ water/waste water installations as conditions allow.
- Assist the NSW SES to identify infrastructure at risk of flooding for incorporation into planning and intelligence.

1.5.13 **Engineering Services Functional Area:**

a. When requested by NSW SES:
   - Provide engineering advice regarding the integrity of damaged structures.
   - Assist the NSW SES with damage assessment.
   - Acquire and/or provide specialist technical engineering expertise.
   - Assist the NSW SES and councils with the assessment and operation of flood protection levees when requested.
   - Assist with property protection, including the construction or repair of levees.
   - Coordinate the restoration of critical public facilities.
   - Establish recovery centre facilities.

1.5.14 **Environmental Services Functional Area:**

a. When requested by NSW SES:
   - Implement the Environmental Services Functional Area (Enviroplan) Supporting Plan if required.
   - Activate the Hazmat/CBR Emergency Sub Plan if required.

1.5.15 **Fire and Rescue NSW, Belmont, Cardiff, Charlestown, Holmesville, Morisset, Swansea, Teralba, Tingira Heights Toronto, Wangi Wangi and Windale**

a. Assist the NSW SES with the delivery of evacuation warnings and evacuation orders.

b. Assist the NSW SES with the conduct of evacuations.
c. Provide equipment for pumping flood water out of buildings and from low-lying areas.
d. Assist with clean-up operations, including the hosing out of flood affected properties.
e. Deploy fire resources to appropriate locations if access is expected to be lost.

1.5.16 **Health Services Functional Area**:  
   a. When requested by NSW SES:
      - Activate Healthplan if required.
      - Ensure that appropriate business continuity plans are developed for essential health infrastructure and are activated during floods.
      - Provide medical support to the NSW SES.
      - Establish health surveillance in affected areas.
      - Assess potential public health risks that either acutely endanger the health of human populations or are thought to have longer term consequences.
      - Provide environmental health advice.
      - Provide public health warnings and advice to affected communities.
      - Assist the NSW SES with the warning and evacuation of hospitals.

1.5.17 **Lake Macquarie City Council**:  

**Preparedness**  
   a. Establish and maintain floodplain, estuary and coastal risk management committees and ensure that key agencies are represented on such committees.
   b. Provide levee studies, flood studies, floodplain risk management studies/plans and coastal management study/plans to the NSW SES.
   c. Provide information on the consequences of dam failure to the NSW SES for incorporation into planning and flood intelligence.
   d. Maintain a plant and equipment resource list for the council area.
   e. Contribute to the development and implementation of a public education program.

**Response**  
   f. At the request of the NSW SES Lake Macquarie City Local Incident Controller, deploy personnel and resources for flood and coastal erosion related activities.
g. Close and reopen council roads (and other roads nominated by agreement with the RMS) and advise the NSW SES Lake Macquarie City Local Incident Controller and the Police.

h. Provide information on the status of roads.

i. Provide filled sandbags to urban and village areas in which flooding is expected.

j. Provide back-up radio communications.

k. In the event of evacuations, assist responsible agencies with making facilities available for the domestic pets and companion animals of evacuees.

l. During periods of coastal erosion from ocean storms:
   - Assist the NSW SES with reconnaissance of coastal erosion risk areas
   - Liaise with the NSW SES Lake Macquarie City Local Incident Controller to provide advice regarding the need for response actions by the NSW SES such as evacuations.
   - Activate the Lake Macquarie City Coastal Zone Management Plan – Emergency Action Plan.

Recovery

m. Provide for the management of health hazards associated with flooding. This includes removing debris and waste.

n. Support responsible agencies, as appropriate, to ensure premises are fit and safe for reoccupation and assess any need for demolition.

1.5.18 Lake Macquarie City Local Emergency Management Officer:

a. Provide executive support to the LEMC and LEOCON in accordance with the Lake Macquarie City Local Emergency Management Plan.

b. At the request of the NSW SES Lake Macquarie City Local Incident Controller, advise appropriate agencies and officers of the start of response operations.

1.5.19 Lake Macquarie City Local Emergency Operations Controller (LEOCON):

a. Monitor flood operations.

b. Coordinate support to the NSW SES Lake Macquarie City Local Incident Controller if requested to do so.

1.5.20 Marine Rescue NSW – Pelican and Swansea:

a. Assist the NSW SES with the delivery of evacuation warnings and evacuation orders.

b. Assist the NSW SES with the conduct of evacuations.
1.5.21 **Northlakes Chambers of Commerce, Cardiff:**

a. Disseminate information on rising floods within the Cardiff CBD in consultation with the Lake Macquarie NSW SES Local Incident Controller.

1.5.22 **NSW Office of Environment and Heritage:**

a. Provide specialist policy, engineering and scientific advice to councils and the NSW SES on flood related matters including assistance with:
   
   - The identification of flood problems.
   - The implementation of floodplain risk management plans. This involves floodplain management projects which include flood mitigation works, flood warning, strategic land use planning and upgrade of evacuation routes.
   - The exercising of Local Flood Plans.

b. Provide specialist advice flood related matters as follows:
   
   - Provide the NSW SES with access to relevant studies regarding flooding, including Flood Studies and Floodplain Risk Management Studies.
   - Coordinate the collection of post event flood data, in consultation with the NSW SES.
   - Provide advice to the NSW SES in relation to the operation of the Hunter Valley Flood Mitigation Scheme.
   - Provide advice to the NSW SES about conditions which may lead to coastal flooding or retarded river drainage near the coast.
   - Collect and maintain flood data relating to flood heights, velocities and discharges in coastal areas of NSW (through a contract with MHL as discussed separately).
   - Provide data to the Bureau of Meteorology and NSW SES real-time or near real-time access to river height gauges and height data for the development of official flood warnings (through a contract with MHL as described in the Response section of this plan).

1.5.23 **NSW Office of Water**

a. Collect and maintain flood data including data relating to flood heights, velocities and discharges.

b. Provide the Bureau of Meteorology and NSW SES real-time or near real-time access to river height gauges and height data for the development of official flood warnings.

c. Provide flow rating charts for river height gauges.
d. Manage (with technical support from OEH) the approval process under the Water Act 1912 and Water Management Act 2000 for flood control works (earthworks, embankments and levees which can affect the distribution of floodwaters) including:

- Assessment and approval of flood control works (including flood mitigation works) in rural areas designated under the Acts.
- Use of floodplain management plans prepared by OEH in rural areas designated under the Acts to assess flood control work approvals.
- Giving the NSW SES access to relevant studies regarding flooding and studies supporting floodplain management plans prepared by OEH including flood studies, floodplain risk management studies and flood behaviour investigations.

1.5.24 **NSW Police Force, Lake Macquarie Local Area Command (LAC):**

a. Assist the NSW SES with the delivery of evacuation warnings and evacuation orders.

b. Assist the NSW SES with the conduct of evacuation operations.

c. Conduct road and traffic control operations in conjunction with council and/or RMS.

d. Coordinate the registration of evacuees.

e. Secure evacuated areas.

f. (Newcastle Water Police only): Assist in flood rescue operations on Lake Macquarie.

1.5.25 **NSW Rural Fire Service (The Lakes Team):**

a. Provide personnel in rural areas and villages to:

- inform the NSW SES Lake Macquarie City Local Incident Controller about flood conditions and response needs in their own communities, and
- disseminate flood information.

b. Provide personnel and high-clearance vehicles for flood related activities.

c. Assist the NSW SES with the delivery of evacuation warnings and evacuation orders.

d. Assist the NSW SES with the conduct of evacuations.

e. Provide equipment for pumping flood water out of buildings and from low-lying areas.

f. Assist with the removal of caravans.

g. Provide back-up radio communications.
h. Assist with ‘clean-up’ operations, including the hosing of flood affected properties.

i. Deploy fire resources to appropriate locations if access is expected to be lost.

1.5.26 **Prescribed Dam Owners (dams located within or upstream of Lake Macquarie LGA):**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

a. Maintain and operate the Dam Failure Warning System for their Dam(s).

b. Contribute to the development and implementation of a public education program on flooding within the council area.

c. Consult with NSW SES on the determination of dam failure alert levels and notification arrangements when developing Dam Safety Emergency Plans.

d. Maintain Dam Safety Emergency Plans and provide copies to the NSW SES.

e. Provide information on the consequences of dam failure to the NSW SES for incorporation into planning and flood intelligence.

1.5.27 **Public Information Services Functional Area:**

a. When requested by NSW SES:

   - Assist the NSW SES in the establishment and operation of a Joint Media Information Centre.

1.5.28 **Rail Corporation New South Wales Central Train Control Broadmeadow** will:

   - Close and reopen railway lines affected by flood waters and advise the NSW SES.

1.5.29 **Roads and Maritime Services** will:

   - Close and reopen the Pacific Highway, Main Road 217, Main Road 527, and Main Road 674, if affected by flood waters and advise the NSW SES of its status.
• Facilitate the safe reliable access of emergency resources on RMS managed roads.
• Assist the NSW SES with identification of road infrastructure at risk of flooding.
• Manage traffic.
• Assist the NSW SES with the communication of warnings and information provision to the public through variable message signs.

1.5.30 **School Administration Offices (including Catholic Schools Office Newcastle West, Department of Education & Communities Adamstown and Private Schools and Colleges):**

a. Liaise with the NSW SES and arrange for the early release of students whose travel arrangements are likely to be disrupted by flooding and/or road closures (or where required, for students to be moved to a suitable location until normal school closing time).

b. Pass information to school bus drivers/companies and/or other schools on expected or actual impacts of flooding.

c. Assist with coordinating the evacuation of schools when flooding or isolation is expected to occur

d. Provide space in schools for evacuation centres where necessary.

1.5.31 **Surf Life Saving NSW – Catherine Hill Bay, Caves Beach, Redhead and Swansea, Belmont:**

a. Assist the NSW SES with the warning and/or evacuation of at risk communities;

b. Provide space in Surf Life Saving facilities for evacuation centres where required.

1.5.32 **Telecommunication Services Functional Area:**

a. When requested by NSW SES:

• Coordinate the restoration of telephone facilities damaged by flooding.

• Coordinate additional telecommunications support for the NSW SES Headquarters as required.

• Assist the NSW SES to identify infrastructure at risk of flooding for incorporation into planning and intelligence.

1.5.33 **Transport Services Functional Area:**

a. When requested by NSW SES:

• Assist with the coordination of transport for evacuation purposes.

• Assist with the resupply of isolated communities and/or properties
1.5.34 **Welfare Services Functional Area:**

a. When requested by NSW SES;
   
   - Establish and manage evacuation centres, and provide disaster welfare services from recovery centres.
   
   - Administer the Personal Hardship and Distress component of the NSW Disaster Relief Scheme established to provide financial assistance to people affected by emergencies.
PART 2 - PREPAREDNESS

2.1 MAINTENANCE OF THIS PLAN

2.1.1 The NSW SES Lake Macquarie City Local Controller will maintain the currency of this plan by:
   a. Ensuring that all agencies, organisations and officers mentioned in it are aware of their roles and responsibilities.
   b. Conducting exercises to test arrangements.
   c. Reviewing the contents of the plan:
      ● After each flood operation.
      ● When significant changes in land-use or community characteristics occur.
      ● When new information from flood studies become available.
      ● When flood control or mitigation works are implemented or altered.
      ● When there are changes that alter agreed plan arrangements.

2.1.2 The plan is to be reviewed no less frequently than every five years.

2.2 FLOODPLAIN AND COASTAL RISK MANAGEMENT

2.2.1 The NSW SES Lake Macquarie City Local Controller will ensure that:
   a. NSW SES participates in local floodplain and coastal risk management committee activities when those committees are formed, in accordance with the protocols outlined in the NSW SES Controllers Guide.
   b. The NSW SES Hunter Region Headquarters is informed of involvement in floodplain and coastal risk management activities.

2.3 DEVELOPMENT OF FLOOD INTELLIGENCE

2.3.1 Flood intelligence describes flood behaviour and its effects on the community.

2.3.2 The NSW SES maintains a centralised flood intelligence system.

2.4 DEVELOPMENT OF WARNING SYSTEMS

2.4.1 The NSW SES may establish a total flood warning system for areas affected by flooding in consultation with Lake Macquarie City Council. This requires:
   a. An identification of the potential clients of flood warning information at different levels of flooding (ie. who would be affected in floods of differing severities).
   b. Available information about the estimated impacts of flooding at different heights.
c. Identification of required actions and the amounts of time needed to carry them out.

d. Appropriate means of disseminating warnings to different clients and at different flood levels.

2.4.2 **Dora Creek Township Flood Warning System.** The Dora Creek Township Flood Warning System is operated by Manly Hydraulics Laboratory. It consists of an automated stream gauging station at Kalang Road (Dora Creek). The system automatically notifies the NSW SES and two designated members of the Dora Creek District Progress Association residing in Kalang Road and Baker Street, when the Kalang Road gauge reaches a pre-determined height of 1.0 metres AHD. Further information about the Dora Creek Township Flood Warning System can be found in Part 3 – Response, under 3.9.13.

2.5 **PUBLIC EDUCATION**

a. The NSW SES Lake Macquarie City Local Controller, with the assistance of the Lake Macquarie City Council, the NSW SES Hunter Region Headquarters and NSW SES State Headquarters, is responsible for ensuring that the residents of the council area are aware of the flood threat in their vicinity and how to protect themselves from it.

2.5.2 Specific strategies to be employed include:

a. Dissemination of flood-related brochures and booklets in flood liable areas.

b. Talks and displays orientated to community organisations, business and schools.

c. Publicity given to this plan and to flood-orientated NSW SES activities through local media outlets, including articles in local newspapers about the flood threat and appropriate responses.

2.6 **TRAINING**

2.6.1 Throughout this document there are references to functions that must be carried out by the members of the NSW SES Lake Macquarie City and Cooranbong. The NSW SES Lake Macquarie City Local Controller is responsible for ensuring that the members are:

a. Familiar with the contents of this plan.

b. Trained in the skills necessary to carry out the tasks allocated to the NSW SES.
2.7 RESOURCES

2.7.1 The NSW SES Lake Macquarie City Local Controller is responsible for maintaining the condition and state of readiness of NSW SES equipment and the NSW SES Lake Macquarie City Local Headquarters.

2.7.2 The NSW SES Cooranbong Unit Controller has similar responsibilities in relation to the Cooranbong Unit Headquarters and equipment.
PART 3 - RESPONSE

CONTROL

3.1 CONTROL ARRANGEMENTS

3.1.1 The NSW SES is the legislated Combat Agency for floods, storms and tsunami, and is responsible for the control of flood operations. This includes the coordination of other agencies and organisations for flood management tasks.

3.1.2 The NSW SES is the designated Combat Agency for damage control for storms. This includes damage control for coastal erosion and inundation from storm activity, specifically the protection of life and the coordination of the protection of readily moveable household goods and commercial stock and equipment. The NSW SES is not responsible for planning or conduct of emergency beach protection works or other physical mitigation works.

3.1.3 The Local EMPLAN will operate to provide support as requested by the NSW SES Local Incident Controller.

3.2 OPERATIONAL MANAGEMENT

3.2.1 NSW SES utilises the Australasian Inter-service Incident Management System (AIIMS), which is based on three principles:
   a. functional management;
   b. management by objectives; and
   c. span of control.

3.2.2 AIIMS provides for different incident levels based on the complexity of operational management.

3.2.3 The Local Government Area may be divided into sectors and divisions to manage the flood and/or coastal erosion event (divisions are usually a group of sectors).

3.2.4 Sectors and divisions may be based on floodplain classifications, geographical, physical or functional boundaries. A town, city or suburb may be one sector or split into several sectors and divisions.

3.2.5 Floods in the City of Lake Macquarie will initially be managed within the two operational divisions being –
   a. Cooranbong Division (western side of Lake Macquarie from Fennell Bay to Wyee); and
   b. Lake Macquarie Division (covering the remainder of the council area).
3.3 **START OF RESPONSE OPERATIONS**

3.3.1 This plan is always active to ensure that preparedness actions detailed in this plan are completed.

3.3.2 Response operations will begin:

   a. On receipt of a Bureau of Meteorology Preliminary Flood Warning, Flood Warning, Flood Watch, Severe Thunderstorm Warning or a Severe Weather Warning for flash flooding or severe ocean conditions.
   
   b. On receipt of a dam failure alert.
   
   c. On notification that the Kalang Road gauge (Dora Creek) has recorded a level of 1.0 metres.
   
   d. When other evidence leads to an expectation of flooding or coastal erosion within the council area.

3.3.3 Contact with the Bureau of Meteorology to discuss the development of flood warnings will normally be through the NSW SES Hunter Region Headquarters and/or NSW SES State Headquarters.

3.3.4 The following persons and organisations will be advised of the start of response operations regardless of the location and severity of the flooding anticipated:

   a. NSW SES Hunter Region Headquarters.
   
   b. NSW SES Lake Macquarie City Local Controller.
   
   c. NSW SES Cooranbong Unit Controller.
   
   d. NSW SES Lake Macquarie City and Cooranbong Units.
   
   e. Lake Macquarie City Local Emergency Operations Controller (for transmission to the NSW Police Force Local Area Command Headquarters).
   
   f. Lake Macquarie City Local Emergency Management Officer (for transmission to appropriate council officers and departments).
   
   g. Lake Macquarie City Council Mayor.
   
   h. Other agencies listed in this plan will be advised by the Local Emergency Management Officer on the request of the NSW SES Lake Macquarie City Local Incident Controller and as appropriate to the location and nature of the threat.

3.4 **RESPONSE STRATEGIES**

3.4.1 The main response strategies for NSW SES flood operations include:

   a. Information Provision and Warning
      
      * Provision of warnings, information and advice to communities.
• Inform the community regarding the potential impacts of a flood and what actions to undertake in preparation for flooding.
• Inform the community regarding the potential impacts of coastal erosion and what preparatory actions to undertake.
• Provide timely and accurate information to the community.

b. Property protection
• Protect the property of residents and businesses at risk of flood damage.
• Assistance with property protection by way of sandbagging and the lifting or transporting of furniture, personal effects, commercial stock and caravans.
• Assistance with the relocation of readily moveable household goods and commercial stock and equipment from properties threatened by coastal erosion.
• Assistance with the protection of essential infrastructure.

c. Evacuation
• The temporary movement of people from a dangerous or potentially dangerous place to a safe location, and their eventual return. It is a safety strategy which uses distance to separate people from the danger created by the hazard.

d. Rescue
• The rescue or retrieval of persons trapped by floodwaters.

e. Resupply
• Minimise disruption upon the community by resupplying towns and villages which have become isolated as a consequence of flooding.
• Ensure supplies are maintained to property owners by coordinating the resupply of properties which have become isolated as a consequence of flooding.

3.4.2 The NSW SES Lake Macquarie City Local Incident Controller will select the appropriate response strategy to deal with the expected impact of the flood in each sector and/or community. The impact may vary so a number of different strategies may need to be selected and implemented across the whole operational area. The available strategies for each sector and/or community are maintained by the NSW SES.

3.4.3 Supporting strategies may include:
• Protect the community from incidents involving fire and hazardous materials
• Maintain the welfare of communities and individuals affected by the impact of a flood.
c. Minimise disruption to the community by ensuring supply of essential energy and utility services.

d. Ensure coordinated health services are available to and accessible by the flood affected communities.

e. Maintain the welfare of animals affected by the impact of a flood.

3.5 OPERATIONS CENTRES

3.5.1 The NSW SES Lake Macquarie City Operations Centre is located at the corner of Creek Reserve Road and Fourth Street, Boolaroo.

3.5.2 The NSW SES Cooranbong Operations Centre is located at the corner of Martinsville Road and Freemans Drive, Cooranbong.

3.5.3 Supporting EOCs are located at:

a. The Lake Macquarie City Emergency Operations Centre is located at the Rural Fire Service Headquarters, 1A George Booth Drive Cameron Park

3.6 LIAISON

3.6.1 Any agency with responsibilities identified in this plan may be requested by the NSW SES to provide liaison (including a liaison officer where necessary) to the NSW SES Lake Macquarie City Operations Centre.

3.6.2 Liaison officers are to:

a. have the authority to deploy the resources of their parent organisations at the request of the NSW SES Lake Macquarie City Local Incident Controller,

b. advise the NSW SES Lake Macquarie City Local Incident Controller on resource availability for their service, and

c. be able to provide communications to their own organisations.

3.7 END OF RESPONSE OPERATIONS

3.7.1 When the immediate danger to life and property has passed the NSW SES Hunter Region Incident Controller or the NSW SES Lake Macquarie City Local Incident Controller will issue an "all clear" message signifying that response operations have been completed. The message will be distributed through the same media outlets as earlier evacuation messages. The relevant Controller will also advise details of recovery coordination arrangements, arrangements made for clean-up operations prior to evacuees being allowed to return to their homes, and stand-down instructions for agencies not required for recovery operations.
PLANNING

3.8 COLLATING SITUATIONAL INFORMATION

Strategy

3.8.1 The NSW SES maintains and records situational awareness of current impacts and response activities.

Actions

3.8.2 The NSW SES Lake Macquarie City Local Headquarters collates information on the current situation in the Lake Macquarie City LGA and incorporates in Situation Reports.

3.8.3 The NSW SES Hunter Region Headquarters collates Region-wide information for inclusion in Region Situation Reports.

3.8.4 Sources of situational information during times of flooding are:

a. **Agency Situation Reports.** Agencies and functional areas provide regular situation reports (SITREPs) to the NSW SES.

b. **Active Reconnaissance.** The NSW SES Lake Macquarie City Local Incident Controller is responsible for coordinating the reconnaissance of impact areas, recording and communicating observations. Reconnaissance can be performed on the ground and using remote sensing (more commonly aerial). The NSW SES monitors the following problem areas:
   - Kalang Road, Doree Place, Baker Street and Stingaree Point Drive at Dora Creek Township
   - Cardiff CBD

d. **Manly Hydraulics Laboratory (a business unit within NSW Public Works)** automated river watch system funded by the Office of Environment and Heritage. This system provides river height and rainfall readings for a number of gauges in the Lake Macquarie City Council area. Recent data from this system is available on the Manly Hydraulic Laboratory website: [http://www.mhl.nsw.gov.au](http://www.mhl.nsw.gov.au). A history of area floods is also available upon request via the website.

e. **NSW Office of Water.** This office advises flow rates and rates of rise for the Lake Macquarie, and Dora Creek. Daily river reports containing information on gauge heights and river flows are available from the website: [http://waterinfo.nsw.gov.au/](http://waterinfo.nsw.gov.au/)

f. **Winding Creek Dam Storage Monitoring System.** This system provides information on Winding Creek Retention Basin No 5 and is monitored by the Hunter Water Corporation.
g. **NSW SES Hunter Region Headquarters.** The Region Headquarters provides information on flooding and its consequences, including those in nearby council areas (this information is documented in Bulletins and Situation Reports).

### 3.8.5 During flood operations sources of information on roads closed by flooding include:

- a. Lake Macquarie City Council website [http://lakemac.com.au](http://lakemac.com.au) and/or telephone service 4921 0333
- b. Lake Macquarie Police Local Area Command
- c. Roads and Maritime Services website [www.rms.nsw.gov.au](http://www.rms.nsw.gov.au) and/or telephone service 132 701
- d. NSW SES Hunter Region Headquarters
- e. NSW SES Lake Macquarie City Local Headquarters.

### 3.8.6 Situational information relating to consequences of flooding and/or coastal erosion should be used to verify and validate NSW SES Flood Intelligence records.

## 3.9 PROVISION OF FLOOD INFORMATION AND WARNINGS

### Strategy

**3.9.1** The NSW SES Lake Macquarie City Local Headquarters provides advice to the NSW SES Hunter Region Headquarters on current and expected impacts of flooding in the Lake Macquarie City LGA.

**3.9.2** The NSW SES Hunter Region Headquarters issues Flood Bulletins, Livestock and Equipment Warnings, Evacuation Warnings and Evacuation Orders to media outlets and agencies on behalf of all NSW SES units in the Region.

### Actions

**3.9.3** The NSW SES Lake Macquarie City Local Incident Controller will ensure that the NSW SES Hunter Region Incident Controller is regularly briefed on the progress of operations.

**3.9.4** NSW SES Lake Macquarie City Local Headquarters operations staff will be briefed regularly so that they can provide information in response to inquiries received in person or by other means such as phone or fax.

**3.9.5** **Bureau of Meteorology Severe Thunderstorm Warning.** These are issued direct to the media by the Bureau when severe thunderstorms are expected to produce dangerous or damaging conditions, including flash flooding. Severe thunderstorms are usually smaller in scale than events covered by Flood Watches and Severe Weather Warnings.

**3.9.6** **Bureau of Meteorology Severe Weather Warnings for Flash Flooding.** These are issued direct to the media by the Bureau and provide a warning of the possibility for flash flooding as a result of intense rainfall. These warnings are
issued when severe weather is expected to affect land based communities with 6 to 24 hours. Severe Weather Warnings may also include other conditions such as Damaging Surf, Dangerous Surf or tides, or Damaging Winds.

3.9.7 **Bureau of Meteorology Flood Watches.** Flood Watches are issued by the Bureau to advise the public of the potential for flooding in a catchment area based on predicted or actual rainfall. Flood Watches will be included in Flood Bulletins issued by the NSW SES Hunter Region Headquarters.

3.9.8 **Bureau of Meteorology Flood Warnings.** The NSW SES Hunter Region Headquarters will send a copy of Bureau Flood Warnings to the NSW SES Lake Macquarie City Unit. On receipt the NSW SES Local Incident Controller will provide the NSW SES Hunter Region Headquarters with information on the estimated impacts of flooding at the predicted heights for inclusion in NSW SES Region Flood Bulletins.

3.9.9 **NSW SES Livestock and Equipment Warnings.** Following heavy rain or when there are indications of significant creek or river rises (even to levels below Minor Flood heights), the NSW SES Lake Macquarie City Local Incident Controller will advise the NSW SES Hunter Region Headquarters which will issue Livestock and Equipment Warnings.

3.9.10 **NSW SES Local Flood Advices.** The NSW SES Local Incident Controller may issue Local Flood Advices for locations not covered by Bureau Flood Warnings. They may be provided verbally in response to phone inquiries but will normally be incorporated into NSW SES Region Flood Bulletins.

3.9.11 **NSW SES Flood Bulletins.** The NSW SES Hunter Region Headquarters will regularly issue Flood Bulletins which describe information on the estimated impacts of flooding at the predicted heights (using information from Bureau Flood Warnings and NSW SES Local Flood Advices) to NSW SES units, media outlets and agencies on behalf of all NSW SES units in the Region. When operations relating to coastal erosion/inundation are being undertaken, NSW SES Region Bulletins will contain information and advice about property damage mitigation measures and evacuation in affected areas.

3.9.12 **NSW SES Evacuation Warnings and Evacuation Orders.** These are usually issued to the media by the NSW SES Region Incident Controller on behalf of the NSW SES Local Incident Controller.

3.9.13 **Special Warnings – Dora Creek Township Flood Warning System.** The Dora Creek Township Flood Warning System is operated by Manly Hydraulics Laboratory. It consists of an automated stream gauging station at Kalang Road (Dora Creek). The system automatically notifies the NSW SES and two designated members of the Dora Creek District Progress Association residing in Kalang Road and Baker Street, when the Kalang Road gauge reaches a predetermined height of 1.0 metres AHD.
3.9.14 When the notification occurs:
   a. The NSW SES Cooranbong Unit Controller arranges for the monitoring of known flood liable areas, the collection of flood information and its dissemination to radio stations.
   b. The Dora Creek District Progress Association members warn other members of the Dora Creek community.

3.9.15 **Dam Failure Alerts.** Dam failure alerts are issued to NSW SES by the dam owner, in accordance with arrangements in the Dam Safety Emergency Plan (DSEP), the system involves the Dam Owner notifying NSW SES State Headquarters Operations Communications Centre, who in turn distribute the warning to the NSW SES Region Headquarters and NSW SES Unit Headquarters.

3.9.16 A flow chart illustrating the notification arrangements for potential dam failure is shown in Attachment 2.

3.9.17 Dam failure alert levels are set in consultation with the NSW SES and are used to trigger appropriate response actions. The conditions that define each of the alert levels are listed in the relevant DSEP. Responses escalate as the alert level migrates from white to amber to red. Table 1 briefly outlines example defining conditions and appropriate NSW SES responses associated with each alert.

<table>

</table>

**Table 1: Dam Failure Alert Levels**

Note: Some DSEPs will have alert levels that proceed directly from White to Red. This is the case if adequate time does not exist between the three alert levels to evacuate the downstream population at risk. The decision to omit the Amber Alert level, and the general setting of Alert levels should be undertaken in consultation with the NSW SES.
3.9.18 The NSW SES / Dam Owner will disseminate warnings to the population at risk of dam failure (these arrangements are specific to each dam, are negotiated between the Dam Owner and NSW SES and are documented in the DSEP).

3.9.19 Special arrangements apply in the case of severe flooding that may have the potential to cause the failure of Lake Pambulalong Dam. Details of these arrangements are maintained by the NSW SES.

3.9.20 **Standard Emergency Warning Signal (SEWS).** This signal may be played over radio and television stations to alert communities to Evacuation Warnings, Evacuation Orders, Special Warnings or Dam-Failure Warnings. Approval to use the signal is associated with who approves the warning/order message.

3.9.21 **The Public Information and Inquiry Centre (PIIC)** (operated by the NSW Police Force) will answer calls from the public regarding registered evacuees.

3.9.22 **The Disaster Welfare Assistance line** is a central support and contact point for disaster affected people inquiring about welfare services advice and assistance.

3.9.23 **NSW Transport Management Centre 24 hour traffic Line (132 701)** will provide advice to callers on the status of roads. The Live traffic website also lists road closure information.

3.9.24 **Lake Macquarie City Council** will provide information on the status of roads.

3.9.25 Collation and dissemination of road information is actioned as follows:

   a. As part of Situation Reports, the NSW SES Lake Macquarie City Local Incident Controller provides road status reports for main roads in the council area to the NSW SES Hunter Region Headquarters.
   
   b. The NSW SES Hunter Region Headquarters distributes information on main roads to NSW SES Hunter Region units, media outlets and agencies as part of NSW SES Flood Bulletins.

**OPERATIONS**

**3.10 AIRCRAFT MANAGEMENT**

3.10.1 Aircraft can be used for a variety of purposes during flood operations including evacuation, rescue, resupply, reconnaissance and emergency travel.

3.10.2 Air support operations will be conducted under the control of the NSW SES Hunter Region Headquarters, which may allocate aircraft to units if applicable.

3.10.3 NSW SES maintains the following information for the Lake Macquarie City Council area:

   a. Locations of suitable helicopter landing points.
   
   b. Locations of suitable airports and records detailing aircraft size and type that can land at airports.
   
   c. Intelligence on when access to these locations is expected to be lost.
3.11 ASSISTANCE FOR ANIMALS

3.11.1 Matters relating to the welfare of livestock, companion animals and wildlife are to be referred to Agriculture and Animal Services.

3.11.2 Requests for emergency supply and/or delivery of fodder to stranded livestock, or for livestock rescue, are to be referred to Agriculture and Animal Services.

3.11.3 Requests for animal rescue should be referred to the NSW SES.

3.12 COMMUNICATION SYSTEMS

3.12.1 The primary means of communications between fixed locations is by telephone, email and facsimile.

3.12.2 The primary means of communication to and between deployed NSW SES resources is by the Government Radio Network (GRN).

3.12.3 All liaison officers will provide their own communication links back to their parent agencies.

3.12.4 All other organisations will provide communications as necessary to their deployed field teams.

3.12.5 Back-up communications are provided as follows:
   a. Lake Macquarie City Council VHF radio network.
   b. Lake Macquarie City Rural Fire Service UHF and GRN radio networks.

3.13 PRELIMINARY DEPLOYMENTS

3.13.1 When flooding is expected to be severe enough to cut road access to towns, within towns and/or rural communities, the NSW SES Lake Macquarie City Local Incident Controller will ensure that resources are in place for the distribution of foodstuffs and medical supplies to the areas that could become isolated.

3.13.2 When access between locations is expected to be cut, the NSW SES Lake Macquarie City Local Incident Controller will advise appropriate agencies so that resources (including sandbags, fire fighting appliances, ambulances, etc.) are deployed to ensure that operational capability is maintained.

3.14 ROAD AND TRAFFIC CONTROL.

3.14.1 A number of roads within the council area are affected by flooding. NSW SES maintains details of these roads.

3.14.2 The council closes and re-opens its own roads. The RMS closes and re-opens the Pacific Highway, Main Road 217, main Road 527 and Main Road 674.
3.14.3 The NSW Police Force has the authority to close and re-open roads but will normally only do so (if the Council or the RMS have not already acted) if public safety requires such action.

3.14.4 When resources permit, the NSW SES assists Council, RMS or the Police by erecting road closure signs and barriers.

3.14.5 In flood events, the NSW SES Lake Macquarie City Local Incident Controller may direct the imposition of traffic control measures. The entry into flood affected areas will be controlled in accordance with the provisions of the State Emergency Service Act, 1989 (Part 5, Sections 19, 20, 21 and 22) and the State Emergency Rescue Management Act, 1989 (Part 4, Sections 60KA, 60L and 61).

3.14.6 Police, RMS or Council officers closing or re-opening roads or bridges affected by flooding are to advise the NSW SES Lake Macquarie City Local Headquarters, which will then provide a road information service to local emergency services, the public and the NSW SES Hunter Region Headquarters. All such information will also be passed to the Police, RMS and the Council.

3.15 STRANDED TRAVELLERS

3.15.1 Flood waters can strand travellers. Travellers seeking assistance will be referred to the Welfare Services Functional Area for the arrangement of emergency accommodation.

3.16 MANAGING PROPERTY PROTECTION OPERATIONS

Strategy

3.16.1 Protect the property of residents and businesses at risk of flood damage.

Actions

3.16.2 The NSW SES is the responsible agency for the coordination of operations to assist property protection.

3.16.3 Property may be protected from floods by:
   a. Lifting or moving of household furniture.
   b. Lifting or moving commercial stock and equipment.
   c. Sandbagging to minimise entry of water into buildings.

3.16.4 The NSW SES maintains stocks of sandbags.

3.16.5 Property protection options are however very limited in the Lake Macquarie City Area due to the large number of properties that can be affected by flash flooding and lake rises.

3.16.6 Property protection measures for the threat of coastal erosion involves the relocation of readily moveable household goods and commercial stock and equipment. The NSW SES is not responsible for planning or conduct of emergency beach protection works or other physical mitigation works.
3.17 MANAGING FLOOD RESCUE OPERATIONS

**Strategy**

3.17.1 Rescue of people from floods.

**Actions**

3.17.2 The NSW SES Lake Macquarie City Local Incident Controller controls flood rescue in Lake Macquarie City local government area.

3.17.3 Flood rescues, may be carried out by accredited units in accordance with appropriate standards.

3.17.4 Additional flood boats and crews can be requested through the NSW SES Hunter Region Headquarters.

3.17.5 In the Dora Creek Community there may be some residual population which did not evacuate during the early stages of flooding and which require rescue.

3.18 MANAGING EVACUATION OPERATIONS

**Strategy**

3.18.1 When there is a risk to public safety, evacuation is the primary strategy. Circumstances may include:

a. Evacuation of people when their homes or businesses are likely to flood.

b. Evacuation of people who are unsuited to living in isolated circumstances, due to flood water closing access.

c. Evacuation of people where essential energy and utility services are likely to fail, have failed or where buildings have been made uninhabitable.

d. Evacuation of people when their homes or business are at threat of collapse from coastal erosion

**Actions**

3.18.2 The evacuation operation will have the following stages:

a. Decision to evacuate.

b. Mobilisation (mobilisation may begin prior to the decision to evacuate).

c. Evacuation Warning delivery.

d. Evacuation Order delivery.

e. Withdrawal.

f. Shelter.

g. Return.

3.18.3 During floods evacuations will be controlled by the NSW SES. Small-scale evacuations will be controlled by the NSW SES Lake Macquarie City Local
Incident Controller. Should the scale of evacuation operations be beyond the capabilities of local resources control may be escalated to the NSW SES Hunter Region Incident Controller.

**Decision to evacuate**

3.18.4 In most cases the decision to evacuate rests with the NSW SES Lake Macquarie City Local Incident Controller who exercises his/her authority in accordance with Section 22(1) of The State Emergency Service Act 1989. However, the decision to evacuate will usually be made after consultation with the NSW SES Hunter Region Incident Controller and the Local Emergency Operations Controller.

3.18.5 In events that require large scale evacuations, the decision to evacuate may be escalated to the Region or the State Incident Controller.

3.18.6 Some people will make their own decision to evacuate earlier and move to alternate accommodation, using their own transport. This is referred to as self-motivated evacuation.

**Mobilisation**

3.18.7 The NSW SES Lake Macquarie City Local Incident Controller will mobilise the following to provide personnel for doorknock teams for designated Sectors/locations:

a. NSW SES Lake Macquarie City Unit members,

b. RFS Lake Macquarie District members via the RFS Fire Control Officer,

c. Local Police Force officers

3.18.8 The NSW SES Hunter Region Incident Controller will mobilise any additional personnel required to assist with doorknock teams using:

a. NSW SES members from the NSW SES Hunter Region and surrounding NSW SES Regions

b. FRNSW personnel arranged via the FRNSW Liaison Officer located at NSW SES Hunter Region Headquarters

c. NSW RFS personnel arranged via the NSW RFS Liaison Officer located at NSW SES Hunter Region Headquarters

3.18.9 The NSW SES Lake Macquarie City Local Incident Controller will request the Chairperson of the LEMC to provide Council personnel to assist with traffic coordination within the LGA.

3.18.10 The NSW SES Local Incident Controller will arrange liaison officers for Sector Command Centres.

**Delivery of Evacuation Warnings and Evacuation Orders**

3.18.11 The NSW SES will advise the community of the requirements to evacuate. The NSW SES will issue an **Evacuation Warning** when the intent of an NSW SES
Lake Macquarie City Local Incident Controller is to warn the community of the need to prepare for a possible evacuation.

3.18.12 The NSW SES will issue an **Evacuation Order** when the intent of the NSW SES Lake Macquarie City Local Incident Controller is to instruct a community to immediately evacuate in response to an imminent threat.

3.18.13 The NSW SES Lake Macquarie City Local Incident Controller will distribute Evacuation Warnings and Evacuation Orders to:
   a. Sector/Division Command Centres (where established).
   b. Lake Macquarie City Local Emergency Operations Centre
   c. Lake Macquarie City Council
   d. Lake Macquarie Police Local Area Command
   e. Lake Macquarie Rural Fire Service Control Centre
   f. Radio Stations
   g. Other local agencies and specified individuals.

3.18.14 The NSW SES Hunter Region Incident Controller will distribute Evacuation Warnings and Evacuation Orders to:
   a. The NSW SES State Operations Centre.
   b. The NSW SES Lake Macquarie City Local Incident Controller.
   c. Metropolitan media outlets via the Joint Media Information Centre.
   d. Affected communities via dial-out warning systems where installed or applicable.
   e. Relevant media outlets and agencies.

3.18.15 Evacuation Warnings and Evacuation Orders may be delivered through:
   a. Radio and television stations.
   b. Doorknocking by emergency service personnel.
   c. Public address systems (fixed or mobile).
   d. Telephony-based systems (including Emergency Alert).
   e. Two-way Radio.
   f. Direct access to Radio Station

3.18.16 The Standard Emergency Warning Signal (SEWS) may be used to precede all Evacuation Orders broadcast on Radio Stations.

3.18.17 Sector Command Centres, where established, will distribute Evacuation Orders via Emergency Service personnel in doorknock teams to areas under threat of inundation.

3.18.18 Doorknock teams will work at the direction of:
   a. The Sector Commander if a Sector Command Centre is established.
b. The relevant Division Commander where a Sector Command Centre has not been established.

3.18.19 Field teams conducting doorknocks will record and report back the following information to their Incident Controller:

a. Addresses and locations of houses doorknocked and/or evacuated.
b. The number of occupants.
c. Details of support required (such as transport, medical evacuation, assistance to secure house and/or property and raise or move belongings).
d. Details of residents who refuse to comply with the Evacuation Order.

3.18.20 Refusal to evacuate. Field teams cannot afford to waste time dealing with people who are reluctant or refuse to comply with any Evacuation Order. These cases are to be referred to the NSW Police Force.

Withdrawal

3.18.21 Evacuations will generally be carried out in stages starting from the lowest areas, low flood islands and low trapped perimeters; and progressively from higher areas.

3.18.22 The most desirable method of evacuation is via road using private transport. This may be supplemented by buses for car-less people. However, other means of evacuation may also be used if available and as necessary (e.g. by foot, rail, air).

3.18.23 Evacuees who require emergency accommodation or disaster welfare assistance will be directed to designated evacuation centres. Evacuees who have made their own accommodation arrangements will not be directed to evacuation centres. It is not possible to determine in advance how many will fall into this category.

3.18.24 Evacuees will:

a. Continue along the suburban/regional/rural road network to allocated Evacuation Centres.

3.18.25 Health Services. The Health Services Functional Area will coordinate the evacuation of hospitals and health care centres under their management. They will provide assistance, as required, to support other health care facilities e.g. aged care facilities/DoHA.

3.18.26 Schools. School administration offices (Department of Education and Communities, Tertiary Institutions, Catholic Education Office and Private Schools) will coordinate the evacuation of schools if not already closed.

3.18.27 If there is sufficient time between the start of response operations and the evacuation of communities, the NSW SES Hunter Region Incident Controller will discuss the temporary closure of appropriate schools with the Regional Director, Hunter Central Coast Region, Department of Education and
communities. This will enable pupils to stay at home or be returned home so they can be evacuated (if required) with their families.

3.18.28 Note that in the Lake Macquarie City LGA, school principals may close some schools affected by flooding in the early stages of flooding.

3.18.29 **Caravan and Holiday Parks.** When an Evacuation Order is given occupiers of non-movable vans should:

   a. Secure their vans by tying them down to prevent flotation.
   b. Isolate power to their vans.
   c. Collect personal papers, medicines, a change of clothing, toiletries, bedclothes, radios, torches and other components of a home emergency kit.
   d. Lift the other contents of their vans as high as possible within the van.
   e. Move to a designated evacuation centre if they have their own transport, or move to the caravan office to await transport.

3.18.30 Where possible, vans that can be moved will be relocated by their owners. Park managers will arrange for the relocation of mobile vans whose owners do not have a vehicle. NSW SES personnel will assist if required and may be able to provide additional vehicles.

3.18.31 Caravan park managers will ensure that their caravan park is capable of being evacuated within the allocated time.

3.18.32 Advise the NSW SES Lake Macquarie City Local Incident Controller of:

   a. The number of people requiring transport.
   b. Details of any medical evacuations required.
   c. Whether additional assistance is required to effect the evacuation.

3.18.33 Check that no people remain in non-removable vans that are likely to be inundated.

3.18.34 Inform the NSW SES Lake Macquarie City Local Incident Controller when the evacuation of the caravan park has been completed.

3.18.35 Provide the NSW SES Lake Macquarie City Local Incident Controller with a register of people that have been evacuated.

3.18.36 **Assistance Animals, Pets and Companion Animals of Evacuees:** Assistance animals (guide dogs, hearing assistance animals, etc) will remain in the care of their owners throughout the evacuation. This includes transport and access into evacuation centres etc. Due to safety restrictions, it may not be possible to allow companion animals to accompany their owners when being transported via aircraft or flood rescue boats. Agriculture and Animal Services will make separate arrangements for the evacuation and care of companion animals.
3.18.37 **Transport and storage:** Transport and storage of furniture from flood and/or coastal erosion threatened properties will be arranged as time and resources permit.

3.18.38 **Security:** The NSW Police Force will provide security for evacuated areas.

3.18.39 The NSW SES Lake Macquarie City Local Incident Controller is to provide the following reports to the NSW SES Hunter Region Headquarters:
   a. Advice of commencement of the evacuation of each Sector;
   b. Half-hourly progress reports (by Sectors) during evacuations;
   c. Advice of completion of the evacuation of each Sector.

**Shelter**

3.18.40 **Evacuation centres / assembly areas.** The usual purpose of evacuation centres or assembly areas is to meet the immediate needs of disaster affected people following evacuation from an emergency situation, not to provide them with accommodation. Evacuees will be advised to go to or be taken to the nearest accessible evacuation centre, which may initially be established at the direction of the NSW SES Lake Macquarie City Local Incident Controller, but managed as soon as possible by Welfare Services.

3.18.41 The following locations are suitable for use as flood evacuation centres:
   a. Avondale College, 582 Freemans Drive, Cooranbong
   b. Belmont 16’ Sailing Club, The Parade, Belmont
   c. Belmont Golf Club, Pacific Highway, Marks Point
   d. Belmont Sportsman’s Club, Maude Street, Belmont
   e. Central Charlestown League’s Club, 8 Bula Street, Charlestown
   f. Charlestown Bowling Club, Patricia Avenue, Charlestown
   g. Club Macquarie, 458 Lake Road, Argenton
   h. Club Nova Panthers, Munibung Road, Cardiff
   i. Morisset Golf and Country Club, Dora Street, Morisset
   j. Morisset Multi-Purpose Centre, 143 Dora Street, Morisset
   k. Five Islands Recreation Club, Main Road, Speers Point
   l. Toronto RSL Memorial Club, 41 The Boulevarde, Toronto
   m. Windale Gateshead Bowling Club, 2A Lake Road, Windale
   n. West Wallsend Workers Club, Carrington Street, West Wallsend

3.18.42 **Registration:** The NSW Police Force will ensure that evacuees are registered on arrival at the designated evacuation centres.

3.18.43 **Animal shelter compounds:** Animal shelter compounds will be set up for the domestic pets and companion animals of evacuees if required. Facilities will be managed by Agriculture and Animal Services.
Return

3.18.44 The NSW SES Lake Macquarie City Local Incident Controller will advise when return to evacuated areas is safe after flood waters have receded and reliable access is available.

3.18.45 The NSW SES Lake Macquarie City Local Incident Controller will determine when it is safe for evacuees to return to their homes in consultation with:
   a. the Recovery Coordinating Committee (if established),
   b. Welfare Services Functional Area Coordinator (welfare of evacuees),
   c. Engineering Services Functional Area Co-coordinator (electrical safety of buildings, structural integrity of levees/dams),
   d. Health Service Functional Area Coordinator (public health),
   e. Transport Services Functional Areas Coordinator (arrangement of transport),
   f. the Lake Macquarie City LEOCON,
   g. the Lake Macquarie City Council,
   h. NSW SES Region Incident Controller,
   i. Other appropriate agencies/functional areas as required (mitigation and advice regarding identified risks resulting from the flood and/or coastal erosion event).

3.18.46 Once it is considered safe to do so, the NSW SES Incident Controller will authorise the return of evacuees.

3.18.47 The return will be controlled by the NSW SES Local Incident Controller and may be conducted, at their request, by the Recovery Coordinator.

3.19 MANAGING RESUPPLY OPERATIONS

3.19.1 The NSW SES is responsible for the coordination of the resupply of isolated communities and properties.

3.19.2 If isolation is expected to occur, residents should be encouraged to consider their needs and suitability for an unknown period of isolation.

3.19.3 If properties/communities are going to remain in locations expected to become isolated, households/retailers should be encouraged to stock up on essential supplies.

3.19.4 Where practicable, once supplies are delivered to the NSW SES designated loading point, the NSW SES Lake Macquarie City Local Incident Controller will arrange for the delivery of essential foodstuffs, fuels or urgent medical supplies required by an isolated property or community.

3.19.5 All reasonable efforts will be made to deliver supplies, however where necessary the NSW SES will prioritise the delivery of items.
Resupply of Isolated Towns and Villages

**Strategy**

3.19.6 Minimise disruption upon the community by resupplying towns and villages which have become isolated as a consequence of flooding.

**Actions**

3.19.7 The NSW SES is responsible for the coordination of the resupply of isolated communities.

3.19.8 If flood predictions indicate that areas are likely to become isolated, the NSW SES Local Incident Controller should advise retailers that they should stock up.

3.19.9 When isolation occurs, retailers will be expected to place orders with suppliers where they have a line of credit and to instruct those suppliers to package their goods and deliver them to loading points designated by the NSW SES.

3.19.10 The NSW SES is prepared to deliver mail to isolated communities but may not be able to do so according to normal Australia Post timetables.

3.19.11 The NSW SES will assist hospitals with resupply of linen and other consumables where able.

Resupply of Isolated Properties

**Strategy**

3.19.12 Ensure supplies are maintained to properties by coordinating the resupply of properties which have become isolated as a consequence of flooding.

**Actions**

3.19.13 The resupply of isolated properties is a common requirement during floods and coordination can be difficult because requests can emanate from a variety of sources. Isolated properties may call their suppliers direct, place their orders through their own social networks or contact the NSW SES.

3.19.14 The principles to be applied when planning for the resupply of isolated properties are:

a. The NSW SES will coordinate resupply and establish a schedule.

b. Some isolated households will not have the ability to purchase essential grocery items due to financial hardship. If an isolated household seeks resupply from the NSW SES and claims to be, or is considered to be, in dire circumstances, he/she is to be referred to Welfare Services for assessment of eligibility. Where financial eligibility criteria are met, Welfare Services will assist with the purchase of essential grocery items. Welfare Services will deliver the essential grocery items to the NSW SES designated loading point for transport.

c. Local suppliers will liaise with the NSW SES regarding delivery of resupply items to the designated loading point.
d. Local suppliers are responsible for packaging resupply items for delivery.

A flowchart illustrating the Resupply process is shown in Attachment 1. Please note that the flowchart outlines the resupply process but does not encompass all potential situations and/or outcomes.
PART 4 - RECOVERY

4.1 RECOVERY COORDINATION AT THE LOCAL LEVEL

4.1.1 The NSW SES Lake Macquarie City Local Incident Controller will ensure that planning for long-term recovery operations begins at the earliest opportunity, initially through briefing the Local Emergency Management Committee (LEMC). As soon as possible the LEMC will meet to discuss recovery implications including the need for a Local Recovery Committee. The LEMC will consider any impact assessment in determining the need for recovery arrangements. This is conveyed in the first instance to the State Emergency Operations Controller (SEOCON) for confirmation with the State Emergency Recovery Controller (SERCON).

4.1.2 Once the need for recovery has been identified, the SERCON, in consultation with the SEOCON, may recommend the appointment of a Local Recovery Coordinator and nominate an appropriate candidate to the Minister for Police and Emergency Services.

4.1.3 The SERCON may send a representative to the LEMC and subsequent recovery meetings to provide expert recovery advice and guidance.

4.1.4 The NSW SES Lake Macquarie City Local Incident Controller and Local Emergency Operations Controller (LEOCON) attend recovery meetings to provide an overview of the emergency response operation.

4.1.5 The NSW SES Hunter Region Incident Controller, the Regional Emergency Management Officer and appropriate Regional Functional Area Coordinators will be invited to the initial local meeting and to subsequent meetings as required.

4.1.6 The recovery committee will:

a. develop and maintain a Recovery Action Plan with an agreed exit strategy

b. monitor and coordinate the activities of agencies with responsibility for the delivery of services during recovery

c. ensure that relevant stakeholders, especially the communities affected, are involved in the development and implementation of recovery objectives and strategies and are informed of progress made

d. provide the SERCON with an end of recovery report

e. ensure the recovery is in line with the National Principles of Disaster Recovery and the NSW tenets

4.2 RECOVERY COORDINATION AT THE REGION AND STATE LEVEL

4.2.1 In the event that an emergency affects several local areas, a Region Emergency Management Committee (REMC) will meet to discuss recovery
implications including the need for a Region Recovery Committee. This is conveyed in the first instance to the SEOCON for confirmation with the SERCON.

4.2.2 In the event of an emergency which affects multiple Regions, or is of state or national consequence, or where complex, long term recovery and reconstruction is required, it may be necessary to establish a State Recovery Committee and the appointment of a State Recovery Coordinator.

4.3 ARRANGEMENTS FOR DEBRIEFS / AFTER ACTION REVIEWS

4.3.1 As soon as possible after flooding has abated, the NSW SES Lake Macquarie City Local Controller will advise participating organisations of details of response operation after action review arrangements.

4.3.2 The NSW SES Lake Macquarie City Local Controller will ensure that adequate arrangements are in place to record details of the after action review and each item requiring further action is delegated to an organisation or individual to implement.

4.3.3 Follow-up to ensure the satisfactory completion of these actions will be undertaken by the Lake Macquarie City Local Emergency Management Committee.
ATTACHMENT 1 - RESUPPLY FLOWCHART

Please Note: The chart outlines the resupply process, but does not encompass all potential situations and outcomes.
ATTACHMENT 2 - DAM FAILURE ALERT NOTIFICATION ARRANGEMENTS FLOWCHART

Notification Arrangements for Potential Dam Failure

DAM OWNER/OPERATOR
ISSUES WHITE/ AMBER / RED ALERT

PRIMARY CONTACT

ALTERNATE CONTACT (To be used ONLY if SES cannot be contacted)

NSW SES State Operations Communications Centre (OCC)
Ph: (see note 4 below)

NSW SES Region HQ Operations Controller / After Hours Duty Officer

NSW SES Local Controller(s) / After Hours Duty Officer

Duty Officer, State Emergency Operations Centre (SEOCC) Ph (see note 4 below)

Region Emergency Management Officers (REMOs)

Local Emergency Operations Controllers (LECCOs)

Response Controlled through Local Flood Plan/s with reference to DSEP for potential inundation area

Activation of the Local Flood Plan includes notification to the LECCO and activation of supporting arrangements within the Local DISPLAN

NOTES:
1. Dam owners should only contact the SEOCC if the SES State Operations Communications Centre (OCC) cannot be contacted.
2. The first priority for notification is to contact the next SES HQ or the next level of EOC down the flowchart. The second notification should always be across the flow chart to confirm the message is received. If the first priority notification fails or is not picked up for any reason, the second priority notification should be made before any further attempts to contact the first priority (this is why an alternate or backup system of contacts is in place).
3. The triple zero (000) number for emergency services should not be used unless contact cannot be made with SES or the SEOCC, as it is likely the triple zero (000) operators will have difficulty dealing with the very unusual case of potential or actual dam failure.
4. Dam owners must contact the SES State Headquarters during the preparation of the DSEP to obtain the appropriate emergency contact numbers.
ATTACHMENT 3 - LAKE MACQUARIE CITY LGA MAP
